Health Sciences & Nutrition

This practical text presents a wealth of fresh ideas and techniques for strengthening counseling skills to face real-world issues in nutrition therapy. It offers students and practitioners advice on ways to increase referrals, decrease no-shows, and overcome common barriers to effective counseling. The Third Edition also explores strategies for counseling patients with AIDS, diabetes, and other chronic diseases, for group therapy, for teaching developmental skills, and for end-of-life counseling. This edition has a new reader-friendly design and layout. New learning activities—including case

studies and critical thinking exercises—encourage students to apply what they have learned to common situations in clinical practice.

Through appropriate counseling and intervention, nutritionists play an important role in encouraging clients to make and maintain healthy dietary changes. *Nutrition Counseling Skills for the Nutrition Care Process, Fourth Edition*, provides the latest counseling theory and communication techniques for clinical and community settings within the context of the American Dietetic Association Nutrition Care Process. The Fourth Edition focuses on tailoring intervention strategies to a client's dietary needs through effective interviewing, assessment, and counseling. This revision addresses the unique needs nutrition counselors face regarding obesity, heart disease, diabetes, renal disease, hypertension, cancer,

counseling and education principles, opportunities to practice new skills, and knowledge of evaluation methodologies in an organized, accessible, and engaging approach. The authors' clear style helps readers translate theoretical perspectives on nutrition counseling into actual effective dialogues between client and counselor to influence client knowledge, skills, and attitudes. In addition, since the goals and objectives of nutrition counselors and educators complement each other, the scope of this text has expanded to include elements unique to nutrition education. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The text covers communications, counseling, interviewing, motivating clients, delivering oral presentations and using media in

presentations. Communication is basic to the relationship that the Registered Dietitian (RD) professional has with their clients. The Academy of Nutrition and Dietetics recognizes the importance of communication skills for practitioners to promote health, disease prevention and treatment. Providing people with information on what to eat is not enough, the RD must also promote and facilitate behavior changes to more healthful food choices. The text incorporates the Nutrition Care Process (NCP) and model, including four steps of nutrition assessment, nutrition diagnosis using PES statement (Problem, Etiology and Signs/Symptoms), nutrition intervention, and nutrition monitoring and evaluation. The PES statements are the most critical in that the Academy of Nutrition and Dietetics has been stressing this as an essential component of their standards and requirements. The text uses
