Elena Fast answered on Oct 28, 2020. Grand Larceny under NY law is items valued at \$1,000 or more, or when the property taken consists of a debit card or a credit card. Chances are, if itℓs a wallet, there was at least one debit card or a credit card in there.

Employee theft amounts to roughly \$36.6 billion retail dollars lost annually, according to a 2008 National Retail Security Survey, and accounts for approximately 42.7 % of all retail losses. Each year organizations spend millions of dollars on theft detection/prevention devices yet still incur losses at the hands of their own employees; begging the question not of how theft occurs, but why. Discussing the concept of the Theft Triangle (opportunity, motivation, and insufficient deterrents), Retail Security and Loss Prevention Solutions investigates motivational factors that contribute to loss and describes philosophies that can change the entire spectrum of employee dishonesty. It cites the revolutionary approach adopted by the New York Subway System, demonstrating that by changing the overall presentation of the business and contending with the factors preceding the crime, the crime itself can be avoided. As the title "Loss Prevention Professional" implies, the intention is to stop the damage before it occurs. To this end, chapters discuss behaviors that precede a loss event, theoretical perspectives and research on employee deviance and motivation, and methods to control employee dishonesty through deterrents as well as ethical infrastructures. Detailing the intricacies of the Loss Prevention Profession and the myriad skills involved such as accounting, forensics, fraud detection, human behavior analysis, and interview/interrogation skills, the authors give advice on how to select the right individuals for the job and how to build a Loss Prevention department. They employ real life case studies and interviews and discuss the problems and solutions for the future of loss prevention as a whole.

Throughout history, there has been an intrinsic need for humans to detect deception in other humans. Developed in 1923, the polygraph machine was a tool designed to do just this. To date, there have been many improvements made to the basic polygraph instrument. This book outlines the instrumentation as well as the latest in questioning techniques and methods available to the professional interviewer to determine truth from deception. The book covers psychology and physiology, a history of polygraph with the advances of leading figures, question formulation, data analysis, legal implications and legal cases, and the authorℓs developed technique Integrated Zone Comparison Technique (IZCT).

Crime analysis has become an increasingly important part of policing and crime prevention, and thousands of specialist crime analysts are now employed by police forces worldwide. This is the first book to set out the principles and practice of crime analysis, and is designed to be used both by crime analysts themselves, by those responsible for the training of crime analysts and teaching its principles, and those teaching this subject as part of broader policing and criminal justice courses. The particular focus of this book is on the adoption of a problem solving approach, showing how crime analysis can be used and developed to support a problem oriented policing approach ℓ based on the idea that the police should concentrate on identifying patterns of crime and anticipating crimes rather than just reacting to crimes once they have been committed. In his foreword to this book, Nick Ross, presenter of BBC Crime Watch, argues passionately that crime analysts are 'the new face of policing', and have a crucial part to play in the increasingly sophisticated police response to crime and its approach to crime prevention ℓ 'You are the brains, the expert, the specialist, the boffin.'

Hard Times illustrated Charles Dickens - Hard Times: For These Times (commonly known as Hard Times) is the tenth novel by Charles Dickens, first published in 1854. The book surveys English society and satirises the social and economic conditions of the era. "Now, what I want is, Facts. . . . Facts alone are wanted in life." Thus begins Superintendent Mr. Gradgrindℓa wealthy, retired merchantℓaddressing a group of young students at his school in the industrial town of Coketown, England. A rigid man of fact, rational self-interest and realities, he not only teaches his pupils according to the utilitarian principles, but also raises his children with the same philosophy. When they grow up, as their lives begin to turn chaotic, they reproach their father for their upbringing. Will Mr. Gradgrind realize his flaws and become a humble man? Satirizing the laissez-faire system, Dickens' Hard Times lays bare the wide gap between the rich and the poor. Criticizing the materialistic world, this Victorian novel throws light on the value of emotions and the human heart. It has undergone several film and theatre adaptations.

There are many varieties of procedures to assess criminal and sex offenders that have emerged throughout the 19th and 20th centuries. This book is an attempt to bridge that gap, to provide some historical background of sex offender assessment from 1830 to the present.

Car crime has become a source of increasing concern in recent years. This study takes a detailed look at the perspective of those actually involved in stealing cars, giving some useful insights into the reasons why young people get involved and how their stealing might be stopped. The authors suggest that an important element in preventing further problems would be to provide diversions which offer thieves a comparable degree of excitement and interest to that which they get from stealing cars. Early intervention by criminal justice and social welfare agencies seems central to any preventive action, in order to curb the frequent progression from 'joyriding' to making money from stealing cars.
