The concept of 'sustainability' has been pushed to the forefront of policy-making and politics as the world wakes up to the impacts of climate change and the effects of the modern urban lifestyle. Sustainable Urban and Regional Infrastructure Development: Technologies, Applications and Management, bridges the gap in the current literature by addressing the overall problems present in society's major infrastructures, and the technologies that may be applied to overcome these problems. It focuses on ways in which energy intensive but 'invisible' (to the general public) facilities can become green or greener. The studies presented are lessons to be learnt from our neighbors and from our own backyard, and provide an excellent general overview of the issues facing us all.

In classical Greece women were almost entirely excluded from public life. Yet the feminine was accorded a central place in religious thought and ritual. This volume explores the often paradoxical centrality of the feminine in Greek culture, showing how out of sight was not out of mind. The contributors adopt perspectives from a wide range of disciplines, such as archaeology, art history, psychology and anthropology, in order to investigate various aspects of religion and cult. They include the part played by women in death ritual, the role of heroines, and the fact

that goddesses had no childhood, at the same time posing questions about how we know what rituals meant to their participants. *The Sacred and the Feminine in Ancient Greece* is a lively and colourful exploration of the ways in which religion and ritual reveal women's importance in the Greek polis, showing how ideologies about female roles and behaviour were both endorsed and challenged in the realm of the sacred.
