Shows that a religious understanding of illness and health persisted well into post-Enlightenment early America The COVID-19 pandemic has demonstrated the power of narrative during times of sickness and disease. As Americans strive to find meaning amid upheaval and loss, some consider the nature of God's will. Early American Protestants experienced similar struggles as they attempted to interpret the diseases of their time. In this groundbreaking work, Philippa Koch explores the doctrine of providence—a belief in a divine plan for the world—and its manifestations in eighteenth-century America, from its origins as a consoling response to sickness to how it informed the practices of Protestant activity in the Atlantic world. Drawing on pastoral manuals, manuscript memoirs, journals, and letters, as well as medical treatises, epidemic narratives, and midwifery manuals, Koch shows how Protestant teachings around providence shaped the lives of believers even as the Enlightenment seemed to portend a more secular approach to the world and the human body. Their commitment to providence prompted, in fact, early Americans' active engagement with the medical developments of their time, encouraging them to see modern science and medicine as divinely bestowed missionary tools for helping others. Indeed, the book shows that the ways in which the colonial world thought about questions of God's will in sickness and health help to illuminate the continuing power of Protestant ideas and practices in American society today.

In 2009, after a public appeal, the British Library purchased a manuscript 'Booke', which Captain Narbrough bought in 1666 and into which he subsequently entered his journals of his voyages and correspondence relating to them. The 'Booke' contains his own fair copy of the journal of his voyage through the Strait of Magellan and north to Valdivia in the Sweepstakes, 1669-1671. This is published here for the first time, together with an incomplete and somewhat different copy of the journal, held in the Bodleian Library, which was made for him by a clerk after he returned to England, and which was partially published in 1694. Both versions of the journal together with previously unpublished records made by members of his company, as well as reproductions of the charts which Narbrough relied on and those he produced, are printed here. Narbrough's mission was to carry out a passenger who referred to himself as Don Carlos Enriquez and who claimed to have expert knowledge of Peru and Chile, and contacts with disaffected colonists and indigenous peoples. Don Carlos's written proposals to King Charles II and his ministers, only recently discovered, are here translated from Spanish, and give a clear sense of the character, if not the real identity, of an adventurer, who gave the authorities in England, Chile and Peru totally different and changing stories about his status and the purpose of the voyage. Narbrough's conduct of the voyage has been criticized by later authors who have focussed on his inability recover four of his ship's company from detention in Valdivia and the lack of tangible results, in the form of trade or contacts with indigenous groups. The more complete story provided here shows that Narbrough carried out his ambiguous orders to the letter. His chart of the Strait of Magellan remained the principal chart of the area for the next century. King Charles II and James, Duke of York, both recognized his abilities. He was rapidly re-employed in naval service, subsequently knighted, and rose to become a Commissioner of the Navy and Commander in Chief in the Mediterranean.

Difficult Subjects: Insights and Strategies for Teaching about Race, Sexuality and Gender is a collection of essays from scholars across disciplines, institutions, and ranks that offers diverse and multi-faceted approaches to teaching about subjects that prove both challenging and often uncomfortable for both the professor and the student. It encourages college educators to engage in forms of practice that do not pretend that teachers and students are unaffected by world events and incidents that highlight social inequalities. Readers will find the collected essays useful for identifying new approaches to taking on the "difficult subjects" of race, gender, and sexuality. The book will also serve as inspiration for academics who believe that their area of study does not allow for such pedagogical inquiries to also teach in ways that address difficult subjects. Contributors to this volume span a range of disciplines from criminal justice to gender studies to organic chemistry, and demonstrate the productive possibilities that can emerge in college classrooms when faculty consider "identity" as constitutive of rather than divorced from their academic disciplines. Discussions of race, gender, and sexuality are always hot-button issues in the college classroom, whether they emerge in response to a national event or tragedy or constitute the content of the class over a semester-long term. Even seasoned professors who specialize in these areas find it difficult to talk about identity politics in a room full of students. And many professors for whom issues of racial, and sexual identity is not a primary concern find it even more challenging to raise these issues with students. Offering reflections and practical guidance, the book accounts for a range of challenges facing college educators, and encourages faculty to teach with courage and conviction, especially when it feels as though the world around us is crashing down upon our students and ourselves.
