Put the other end of the test light on the positive terminal of the coil. Turn the key on. If the test light is not lit, verify you have a good ground. If the light is still off, check for a bad connection between the coil and the key switch. Repair as needed.

### ONAN IGNITION SYSTEM TROUBLESHOOTING

Check the fuel levels. If your Onan generator isn ' t running, it may be because fuel levels are too low. While some RV generators will run until the fuel tank has nothing but fumes, the Onan models tend to stop working when you ' re down to a quarter tank. The units that do this are the ones drawing from the gas tank.

Onan Generator Troubleshooting: 13 Tips For RV Generator

If your display lights and indicator displays on your Onan generator won't turn on, check the circuit breaker on the back of the unit to see if it has accidentally been tripped to the "Off" position. If it hasn't, there is an electrical problem inside of your generator. The generator is simply not holding any power and has become damaged.

Troubleshooting an Onan Generator | Hunker

Defective Control Board. As soon as the Onan power generator is up and running, use the multimeter to check the AC output voltages. If there is no AC, proceed to check the field flash voltage through the field flash pin of the board. In the case field flash voltage is not present, the control board may be defective.
