Historica originally developed by the Global Scenario Group (GSG) of the Stockholm Environmental Institute (SEI) as a starting point for analyzing real-life transitions and transformations. 11 contributors from 5 continents present detailed analyses of economic and political transitions in Western and Eastern Europe, the USA, the Middle East, and in Asia, discussing the role of different players in the implementation of the New Sustainability Paradigm. Part I offers an overview of the six scenarios developed by the GSG and a short discussion of significant

papers published by the Great Transition Initiative (GTI) of the Tellus Institute. Next come examples of dramatic historical and current transitions in Western Europe, the USA, Eastern Europe, the Middle East (Arabian Spring), and Asia, as well as an analysis of the potential of humankind to manage a great transition to the new sustainability paradigm. Subsequent chapters highlight the role of culture and education and review the role of different players for the implementation of the new sustainability paradigm. The focus of Part II is on the

ecological pillar of Sustainability. The discussion includes urgent ecological problems including climate engineering, eco-criminality, bioterrorism, biodiversity protection, water, energy, and food security. Part III deals with needed innovations in sustainable waste management and sustainable city architecture, especially big cities in developing and threshold countries, where a significant part of the world population is concentrated. The fourth and final section offers an analysis of insights developed throughout the

Mostenirea reveals the unbridled and oppressive power wielded by the Party in Romania and other Eastern Bloc countries

Collected in one volume, here are backfires and blunders that collapsed empires, crashed economies, and altered the course of the world. From the Maginot Line to the Cuban Missile Crisis, history is filled with bad moves and not-so-bright ideas that snowballed into disasters and unintended consequences. This engrossing book looks at one hundred such tipping points. Japan bombs Pearl Harbor. The Caliphs of Baghdad spend themselves

into bankruptcy. The Aztecs greet the Conquistadors with open arms. Mexico invites the Americans to Texas—and the Americans never leave. And the rest is history...

The assassination of President Kennedy by Lee Harvey Oswald, the American Marine who had defected to the Soviet Union and four years later committed the crime of the century, was an extremely rare Cold War episode in which both sides were vitally interested in hiding the truth. In *Programmed to Kill*, former Lt. Gen. Ion Mihai Pacepa, the highest intelligence official ever to defect from

the Soviet bloc, reveals most of the facts covered up by the Kremlin and addresses the myriad of questions left unanswered by the Warren Commission, the House Select Committee on Assassinations, and the numerous books written on this subject.

There is a considerable difference between real history and discourse history - this book stems from this idea. The author points out that history is constantly reconstructed, adapted and sometimes mythified from the perspective of the present day, of present states of mind and ideologies. Boia

closely examines the process of historical culture and conscience in nineteenth and twentieth century Romania, particularly concentrating on the impact of the national ideology on history. Based upon his findings, the author identifies several key mythical configurations and analyses the manner in which Romanians have reconstituted their own highly ideologized history over the last two centuries. The strength of History and Myth in Romanian Consciousness lies in the author's ability to fully deconstruct the entire Romanian historiographic system and demonstrate the

increasing acuteness of national problems in general, and in particular the exploitation of history to support national ideology.

Former Director of Central Intelligence R. James Woolsey and former Romanian acting spy chief Lt. General Ion Mihai Pacepa, who was granted political asylum in the U.S. in 1978, describe why Russia remains an extremely dangerous force in the world, and they finally and definitively put to rest the question of who killed President Kennedy on November 22, 1963. All evidence points to the fact

that the assassination—carried out by Lee Harvey Oswald—was ordered by Soviet Premier Nikita Khrushchev, acting through what was essentially the Russian leader's personal army, the KGB (now known as the FSB). This evidence, which is codified as most things in foreign intelligence are, has never before been jointly decoded by a top U.S. foreign intelligence leader and a former Soviet Bloc spy chief familiar with KGB patterns and codes. Meanwhile, dozens of conspiracy theorists have written books about the JFK assassination during the past fifty-six years. Most

of these theories blame America and were largely triggered by the KGB disinformation campaign implemented in the intense effort to remove Russia's own fingerprints that blamed in turn Lyndon Johnson, the CIA, secretive groups of American oilmen, Howard Hughes, Fidel Castro, and the Mafia. Russian propaganda sowed hatred and contempt for the U.S. quite effectively, and its operations have morphed into many forms, including the recruitment of global terror groups and the backing of enemy nation-states. Yet it was the JFK assassination, with its explosive aftermath

of false conspiracy theories, that set the model for blaming America first.
