BARII Arabic- Afaan Oromo Dictionary

The study of indigenous religions has become an important academic field, particularly since the religious practices of indigenous peoples are being transformed by forces of globalization and transcontinental migration. This book will further our understanding of indigenous religions by first considering key methodological issues related to defining and contextualizing the religious practices of indigenous societies, both historically and in socio-cultural situations. Two further sections of the book analyse cases derived from European contexts, which are often overlooked in discussion of indigenous religions, and in two traditional areas of study: South America and Africa.
