Parenting helps teens develop the skills and gain the knowledge to be better parents—now or in the future.

Decades of research have demonstrated that the parent-child dyad and the environment of the family — which includes all primary caregivers — are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Strengthen family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, this fourth edition of a bestseller provides tools and guidelines to use to develop more effective and equitable programs of family and community engagement. Written by a team of well-known experts, this foundational text demonstrates a proven approach to implement and sustain inclusive, goal-oriented programs. Readers will find: Many examples and vignettes Rubrics and checklists for implementation of plans CD-ROM complete with slides and notes for workshop presentations

This book presents good news for stressed and concerned parents: it does not require a Ph.D or unlimited hours for parents to make a difference in their

children's education.

Child abuse and neglect are intractable problems exacting a terrible toll on children and rending the very fabric of our society. What can be done to reduce the suffering? If there were simple solutions to abuse and neglect they would have been discovered long ago. There are no easy answers, but in this vivid history of child protection in America, John E.B. Myers introduces realistic policies that will reduce maltreatment and strengthen the system that protects our children. Before it is possible to design viable improvements in today's system, it is necessary to understand how it evolved. The sweeping, beautifully written account of child protection in America traces its growth from colonial days to the present--from the rise and gradual disappearance of orphanages, the growth of foster care, the birth of organized child protection in 1874, and the rise of private societies to prevent cruelty, to the twentieth-century transition to government-operated child protection. Myers goes on to describe the principal causes of child maltreatment, including intergenerational transmission of violence, poverty, substance abuse, cultural violence, excessive corporal punishment, sexual deviance, evolution, mental illness, and domestic violence. Once the causes of maltreatment are clear, it is possible to create solutions. Some of the proposals outlined have been in play for more than a century, while others are new. Policies to combat poverty, expand nurse home visiting programs, increase access to day care, strengthen a sense of community, outlaw corporal punishment, rethink our attitude toward alcohol, and lower the toxicity in popular culture are rooted in a deep understanding of the cycle of violence and challenge traditional ways of thinking. Since it will never be possible to prevent all maltreatment, it is critical to strengthen the existing child protection system. Attainable reforms such as dealing with the lingering effects of racism in the child welfare, reworking funding mechanisms, refocusing leadership, creating a less adversarial system, strengthening foster care, and reinventing the juvenile court point to flaws in our system but demonstrate that progress is possible. This provocative book will challenge all those concerned with children's welfare to move toward real solutions that will make life better for America's most vulnerable children.

A set of teaching/counseling aids for professionals who offer parent education classes, parent counseling, or guidance to parents on child rearing and discipline.

This second edition has the same content as the first edition but includes testimonials and additional submissions from teachers and parents. The Discipline without Stress® Teaching Model is used around the world. The non-coercive (yet non-permissive) approach to promoting responsible behaviour and motivation for learning is totally different from current approaches that use rewards for appropriate behaviour and coercive threats and punishments. The book can be used across the entire teaching spectrum -- in small childcare centres to large high schools and in rural, suburban and urban schools. It can be used in any home or youth setting.
