engages debates

in current art

criticism

concerning the

turn toward

participatory

works of art. In

particular, it

analyzes ludic

participation,

in which play

and games are used organizationally so that

participants

actively engage with or complete the work of art

through their play. Here Stott explores the

complex and systematic organization of

works of ludic participation, showing how these correlate with social systems of communication, exhibition, and governance. At a time when the advocacy of play and participation has become

widespread in our culture, he addresses the shortage of literature on the use of play and games in modern and contemporary arts practice in order to begin a play theory of organization and governance.
