A unique insight into the development of one of the world's most famous tractor marques

This illustrated work covers the stories of five British engineering companies that produced successful ranges of agricultural, earthmoving or construction machinery. County, Doe, Chaseside, Muir-Hill, Matbro and Bray all made extensive use of the Ford tractor skid unit as a basis for their machines and they pioneered the development of the four-wheel drive agricultural tractor in Britain. Stuart Gibbard gives details of all the main models and machines of these manufacturers. He chronicles the fortunes of the firms from the beginning of the 20th century to the present day and discusses many of the personalities involved.

This is the first full-scale history of one of the largest farm tractor manufacturers of all time, peppered with pictures of Massey-Harris, Ferguson, and Massey Ferguson's historic models, collectibles, sales memorabilia, and advertisements from old farm magazines. The Big Book of Massey Tractors tells the story of the mergers and machines that formed Massey Ferguson over several decades, and—because these machines dominated Canadian farms for almost a century—in many ways it also tells the story of Canadian agriculture. Robert Pripps, a longtime tractor aficionado, describes Massey Ferguson's battle with Ford over dominance of the farm tractor industry—a battle the company eventually won, remarkably enough, in view of its initial abject market failure with tractors. From the company's beginnings in 1891, to its 1953 merger with the Ferguson tractor company, to its current ownership by Allis-Gleaner Company (AGCO), Masseys have played a large role in our agricultural history. The Big Book of Massey Tractors celebrates that role and showcases the machines that have helped turn the earth for over a hundred years.

Mac Burns is a retired police detective from Atlanta who makes a new home in the sleepy lowcountry town of Bluffon, South Carolina. Mac is devoted to his divorced status, and not particularly interested in a new relationship, however... Shelby, many years Mac's junior may be interested. Is Mac? Enter Percy, his next door neighbor and a disbarred attorney, who proves to be, at very least, a reliable drinking buddy. When an old acquaintance from his days in Atlanta shows up, his hopes of a "ho hum" existence are quickly dashed. Mac discovers that the instincts he cultivated as a big city cop haven't faded as he reluctantly but purposefully dives into the task of solving a mystery that will take him from Charleston to New Orleans and even back to Atlanta. Nothing could prepare him for the ultimate outcome. Lowcountry Boil is an engaging and entertaining page turner, particularly for fans of crime fiction.

Perkins, a former chief economist at a Boston strategic-consulting firm, confesses he was an "economic hit man" for 10 years, helping U.S. intelligence agencies and multinationals cajole and blackmail foreign leaders into serving U.S. foreign policy and awarding lucrative contracts to American business.

Meet all of the engines in this Thomas & Friends board book with a padded cover! Train-loving boys and girls ages 2 to 5 will love to discover fascinating facts about Thomas, Nia, Bertie, Harold, and all their favorite Thomas & Friends characters in this sturdy board book with padded cover. In the early 1940s, a loving father crafted a small blue wooden train engine for his son, Christopher. The stories that this father, the Reverend W Awdry, made up to accompany the wonderful toy were first published in 1945 and became the basis for the Railway Series, a collection of books about Thomas the Tank Engine and his friends--and the rest is history. Thomas & Friends(TM) are now a big extended family of engines and others on the Island of Sodor. They appear not only in books but also in television shows and movies, and as a wide variety of beautifully made toys. The adventures of Thomas and his friends, which are always, ultimately, about friendship, have delighted generations of train-loving boys and girls for more than 70 years and will continue to do so for generations to come.
