Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This four-color lab manual contains 21 lab exercises, most of which can be completed within two hours and require minimal input from the instructor. To provide flexibility, instructors can vary the length of most exercises, many of which are divided into several parts, by deleting portions of the procedure without sacrificing the overall purpose of the experiment. Taking a consistent approach to each exercise, the second edition provides an even clearer presentation, updated coverage, and increased visual support to enable students to apply concepts from the Human Biology course. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Featuring a clear format and a wealth of illustrations, this lab manual helps biology majors learn science by doing it. This manual includes numerous inquiry-based experiments, relevant activities, and supporting questions that assess recall, understanding, and application. The exercises support any biology text used in a majors course.

This introductory book emphasizes human anatomy and physiology and briefly covers basic chemistry, cells, metabolism, genetics, evolution, and ecology. It contains hundreds of beautiful illustrations and photographs in full color.
