For undergraduates following any course of study, it is essential to develop the ability to write effectively. Yet the processes by which students become more capable and ready to meet the challenges of writing for employers, the wider public, and their own purposes remain largely invisible. Developing Writers in Higher Education shows how learning to write for various purposes in multiple disciplines leads college students to new levels of competence. This volume draws on an in-depth study of the writing and experiences of 169 University of Michigan undergraduates, using statistical analysis of 322 surveys, qualitative analysis of 131 interviews, use of corpus linguistics on 94 electronic portfolios and 2,406 pieces of student writing, and case studies of individual students to trace the multiple paths taken by student writers. Topics include student writers' interaction with feedback; perceptions of genre; the role of disciplinary writing; generality and certainty in student writing; students' concepts of voice and style; students' understanding of multimodal and digital writing; high school's influence on college writers; and writing development after college. The digital edition offers samples of student writing, electronic portfolios produced by student writers, transcripts of interviews with students, and explanations of some of the analysis conducted by the contributors. This is an important book for researchers and graduate students in multiple fields. Those in writing studies get an overview of other longitudinal studies as well as key questions currently circulating. For linguists, it demonstrates how corpus linguistics can inform writing studies. Scholars in higher education will gain a new perspective on college student development. The book also adds to current understandings of sociocultural theories of literacy and offers prospective teachers insights into how students learn to write. Finally, for high school teachers, this volume will answer questions about college writing.

FUSION: INTEGRATED READING AND WRITING. Book 2 is a developmental English book for reading and writing at the essay level. It connects the reading and writing processes so that they are fully reciprocal and reinforcing, using parallel strategies that guide students in analyzing reading to generate writing. FUSION teaches critical reading strategies in conjunction with the shared writing traits, such as main idea, details, and organization, and teaches the types of writing (including research) that students will encounter in their future courses. Grammar instruction is integrated in authentic writing, using high-interest professional and student models. Is today's language at an all-time low? Are pronunciations like cawfee and chawklit bad English? Is slang like my bad or hook up improper? Is it incorrect to mix English and Spanish, as in Yo quiero Taco Bell? Can you write Who do you trust? rather than Whom do you trust? Linguist Edwin Battistella takes a hard look at traditional notions of bad language, arguing that they are often based in sterile conventionality. Examining grammar and style, cursing, slang, and political correctness, regional and ethnic dialects, and foreign accents and language mixing, Battistella discusses the strong feelings evoked by language variation, from objections to the pronunciation NU-cu-lar to complaints about bilingual education. He explains the natural desire for uniformity in writing and speaking and traces the association of mainstream norms to ideas about refinement, intelligence, education, character, national unity and political values. Battistella argues that none of these qualities is inherently connected to language. It is tempting but wrong, Battistella argues, to think of slang, dialects and nonstandard grammar as simply breaking the rules of good English. Instead, we should view language as made up of alternative forms of orderliness adopted by speakers depending on their purpose. Thus we can study the structure and context of nonstandard language in order to illuminate and enrich traditional forms of language, and make policy decisions based on an informed engagement. Re-examining longstanding and heated debates, Bad Language will appeal to a wide spectrum of readers engaged and interested in the debate over what constitutes proper language.

For more than four hundred years, the personal essay has been one of the richest and most vibrant of all literary forms. Distinguished from the detached formal essay by its friendly, conversational tone, its loose structure, and its drive toward candor and self-disclosure, the personal essay seizes on the minutiae of daily life--vanities, fashions, foibles, oddballs, seasonal rituals, love and disappointment, the pleasures of solitude, reading, taking a walk -- to offer insight into the human condition and the great social and political issues of the day. The Art of the Personal Essay is the first anthology to celebrate this fertile genre. By presenting more than seventy-five personal essays, including influential forerunners from ancient Greece, Rome, and the Far East, masterpieces from the dawn of the personal essay in the sixteenth century, and a wealth of the finest personal essays from the last four centuries, editor Phillip Lopate, himself an acclaimed essayist, displays the tradition of the personal essay in all its historical grandeur, depth, and diversity.

In this short, lucid, rich book Michael Dummett sets out his views about some of the deepest questions in philosophy. The fundamental question of metaphysics is: what does reality consist of? To answer this, Dummett holds, it is necessary to say what kinds of fact obtain, and what constitutes their holding good. Facts correspond with true propositions, or true thoughts: when we know which propositions, or thoughts, in general, are true, we shall know what facts there are in general. Dummett considers the relation between metaphysics, our conception of the constitution of reality, and semantics, the theory that explains how statements are determined as true or as false in terms of their composition out of their constituent expressions. He investigates the two concepts on which the bridge that connects semantics to metaphysics rests, meaning and truth, and the role of justification in a theory of meaning. He then examines the special semantic and metaphysical issues that arise with relation to time and tense. On this basis Dummett puts forward his controversial view of reality as indeterminate: there may be no fact of the matter about whether an object does or does not have a given property. We have to relinquish our deep-held realist understanding of language, the illusion that we know what it is for any proposition that we can frame to be true independently of our having any means of recognizing its truth, and accept that truth depends on our capacity to apprehend it. Dummett concludes with a chapter about God.

In this classroom-tested approach to writing, Brock Dethier teaches readers how to analyze and write twenty-one genres that students are likely to encounter in college and beyond. This practical, student-friendly, task-oriented text confidently guides writers through step-by-step processes, reducing the anxiety commonly associated with writing tasks. In the first section, Dethier efficiently presents each genre, providing models; a description of the genres' purpose, context, and discourse; and suggestions for writing activities or "moves" that writers can use to get words on the page and accomplish their writing tasks. The second section explains these moves, over two hundred of them, in chapters ranging from "Solve Your Process Problems" and "Discover" to "Revise" and "Present." Applicable to any writing task or genre, these moves help students overcome writing blocks and develop a piece of writing from the first glimmers of an idea to its presentation. This approach to managing the complexity and challenge of writing in college strives to be useful, flexible, eclectic, and brief—a valuable resource for students learning to negotiate unfamiliar writing situations.

Gaining full "voice" in your writing and knowing how to use it, like a singer, is absolutely essential. This book was born in writing classes where, with early encouragement, writers soon found a "voice." The book took form as I discovered how that was happening. I was determined to help bring these writers to full voice. First, they had to find a personally invested subject. So I asked them to keep a journal/notebook of their own, and to write down whatever came to mind with feeling, just that: memories of recent or past happenings, random thoughts-and images of any sort, including imaginations and dreams. What came with feeling came with voice-raw, refined, soulful, sarcastic, ironic, insightful-and true. The pleasure of voice led naturally to the pleasure of detailed description, which led to dramatic monologues, dialogues, sketches, narratives, and reflections. Exploring these descriptions for meaning led to the pleasure (sometimes pain) of discovery, and of developing meaning further with memiors and personal essays. I structured the book using this sequence-voice to personal essay, which had developed naturally. And added a chapter on modern style.As they wrote, these writers found a natural-modern-style of their own that cleared a path for detailed description, narration, and for thinking things through. Some of the best of these writings profusely illustrate this book. Chapter 8 explores modern style, the cumulative sentence in particular, a style developed by outstanding writers of the past 100 years, among them, Hemingway, Faulkner, Steinbeck, Eudora Welty, and Rachel Carson. Though this is a book about writing, it "doesn't just focus on grammar and style," but "actually tells people how to go about writing," as one reviewer wrote. In all her years as a book publisher, she wishes that she had known about this book in order to "recommend it to the zillions of folks who wanted me to tell them how to write."
