"This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell

about the ancient and

Ancient

Mesopotamia—the area
now called Iraq—has
received less attention
than ancient Egypt and
other long-extinct and
more spectacular
civilizations. But

Online Library

numerous small clay tablets buried in the desert soil for thousands of years make it

possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East.

Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of

picture of the

Mesopotamians of some
three thousand years

he had begun. "To any

This first-ever Surgeon
General's Report on
bone health and
osteoporosis illustrates
the large burden that
bone disease places on
our Nation and its
citizens. Like other
chronic diseases that
disproportionately affect
the elderly, the

Online Library Piepkorn

prevalence of bone disease and fractures is projected to increase markedly as the population ages. If these predictions come true, bone disease and fractures will have a tremendous negative impact on the future well-being of Americans. But as this report makes clear, they need not come true: by

Online Library Piepkorn

working together we can
change the picture of
aging in America.

Osteoporosis, fractures,
and other chronic
diseases no longer
should be thought of as
an inevitable part of
growing old. By
focusing on prevention
and lifestyle changes,
including physical
activity and nutrition, as
well as early diagnosis

Online Library Piepkorn

and appropriate treatment, Americans can avoid much of the damaging impact of bone disease and other chronic diseases. This Surgeon General's Report brings together for the first time the scientific evidence related to the prevention, assessment, diagnosis, and treatment of bone disease. More

Piepkorn

importantly, it provides a framework for moving forward. The report will be another effective tool in educating Americans about how they can promote bone health throughout their lives. This first-ever Surgeon General's Report on bone health and osteoporosis provides much needed information on bone

health, an often overlooked aspect of physical health. This report follows in the tradition of previous Surgeon Generals' reports by identifying the relevant scientific data, rigorously evaluating and summarizing the evidence, and determining conclusions.
