Fuels, Lubricants, Coolants, and Filters easily helps a reader to understand these wonderful liquids and filters better. By starting with the basics, it builds your knowledge step-by-step in a very structured manner.

Covering all thirteen species of wild cattle, Ecology, Evolution and Behaviour of Wild Cattle brings together the contributions of international leading experts on the biology, evolution, conservation status and management of the tribe Bovini, providing: • A comprehensive review of current knowledge on systematic, anatomy and ecology of all wild cattle species (chapters 1 to 8); • A clear understanding of the conservation status of each species and the gaps in our current knowledge (chapters 9 to 20); • A number of case studies on conservation activities and an investigation of some of the most threatened and poorly understood species (chapters 21 to 27). An invaluable resource for students,

researchers, and professionals in behavioural ecology, evolutionary biology and conservation biology, this beautifully illustrated reference work reveals the extraordinary link between wild cattle and humans, the benefits some of these species have brought us, and their key roles in their natural ecosystems.

The provision of support for troops in Iraq and Afghanistan is made more difficult because they operate in remote locations and harsh conditions. Despite the challenging operational environments, the Ministry of Defence (MOD) has successfully delivered around 300,000 personnel and 90,000 tonnes of freight to Iraq and Afghanistan over the last two years. However, it has not consistently met its targets for delivering supplies in a timely fashion. The MOD is taking measures to improve the effectiveness of its supply chain; and the amount of time a unit waits for items to be delivered has reduced by half in Afghanistan and a third in Iraq. 4.2 billion has been approved to upgrade or buy new equipment to meet urgent requirements in the two theatres. The NAO found that the availability of this equipment has generally met or exceeded targets, though there have been spares shortages with some fleets particularly when the vehicle is used for a different purpose than intended. The availability and serviceability of helicopters has exceeded MOD targets, although prioritisation of spare parts for operations has led to reduced availability in the UK. There are also shortages of equipment for Service personnel in the UK to train with, prior to deployment overseas. Accommodation, medical and welfare services to Service personnel on operations are generally satisfactory although provision at the smaller patrol bases is more basic. The helicopter borne Medical Emergency Response Teams provide quick, life-saving medical support to casualties and evacuate them speedily to hospital.

In 2003, for the first time since the Second World War, the United Kingdom took part in an invasion and full-scale occupation of a sovereign State. Saddam Hussein was undoubtedly a brutal dictator who had attacked Iraq's neighbours, repressed and killed many of his own people, and was in violation of obligations imposed by the UN Security Council. But the questions for the Inquiry were: whether it was right and necessary to invade Iraq in March 2003; and whether the UK could - and should - have been better prepared for what followed. The Inquiry concluded that the UK chose to join the invasion of Iraq before the peaceful options for disarmament had been exhausted. Military action at that time was not a last resort. They also concluded that the judgements about the severity of the threat posed by Iraq's weapons of mass destruction - WMD - were presented with a certainty that was not justified. Despite explicit warnings, the consequences of the invasion were underestimated. The planning and preparations for Iraq after Saddam Hussein were wholly inadequate. Military action in Iraq might have been necessary at some point but in March 2003 there was no imminent threat and the majority of the Security Council supported continuing UN inspections and monitoring. The Inquiry identified what lessons should be learned from experience in Iraq, including: the management of relations with allies, especially the US; the importance of collective Ministerial discussion which encourages frank and informed debate and challenge; the need to assess risks, weigh options and set an achievable and realistic strategy; the vital role of Ministerial leadership and co-ordination of action across Government, supported by senior officials; and the need to ensure that both the civilian and military arms of Government are properly equipped for their tasks

This strategy document sets out the Government's analysis of the UK's defence industrial capabilities requirement, and is divided into three parts: i) a strategic overview including information on the principles and processes that underpin procurement and industrial decisions, the need for transparency, the evolving defence industry environment, developments and innovation in defence research technology; ii) a review of different industrial sectors and cross-cutting industrial capabilities; and iii) how the strategy will be implemented and an assessment of implications for the Ministry of Defence and industry as a whole.

This Book of Abstracts is the main publication of the 60th Annual Meeting of the European Association for Animal Production (EAAP) held in Barcelona, Spain, on August 24-27 2009. It contains abstracts of the invited papers and contributed presentations. The meeting addressed subjects relating to science and innovation. Also, important problems were discussed during the sessions of EAAP's nine Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems. In addition joint sessions on topics interesting several disciplines and species were included in the programme.
