Pipe designers and drafters provide thousands of piping drawings used in the layout of industrial and other facilities. The layouts must comply with safety codes, government standards, client specifications, budget, and start-up date. Pipe Drafting and Design, Second Edition provides step-by-step instructions to walk pipe designers and drafters and students in Engineering Design Graphics and Engineering Technology through the creation of piping arrangement and isometric drawings using symbols for fittings, flanges, valves, and mechanical equipment. The book is appropriate primarily for pipe design in the petrochemical industry. More than 350 illustrations and photographs provide examples and visual instructions. A unique feature is the systematic arrangement of drawings that begins with the layout of the structural foundations of a facility and continues through to the development of a 3-D model. Advanced chapters discuss the customization of AutoCAD, AutoLISP and details on the use of third-party software to create 3-D models from which elevation, section and isometric drawings are extracted including bills of material. Covers drafting and design fundamentals to detailed advice on the development of piping drawings using manual and AutoCAD techniques 3-D model images provide an uncommon opportunity to visualize an entire piping facility Each chapter includes exercises and questions designed for review and practice

This text provides total instruction in welding, other joining processes, and cutting that takes students from elementary procedures to technician skills. Based on the recommendations of the American Welding Society and other authorities, this text is accurate and thorough. Both the principles (why) and practice (how to) are presented for gas, arc, and semi-automatic welding, brazing, soldering, and plastic welding processes. The text offers comprehensive treatment of equipment, electrodes, types of joints and welds, testing and inspection, metals and their welding characteristics, safety, and print reading. Photographs and drawings show the latest techniques and equipment. Course outlines are provided for each major process with emphasis on learning by doing.
