For decades Polar paper cutters have been some of the most popular and reliable models on the market. This fact simply means that there are a lot of different Polar cutters on the market and thus a lot of need for replacement knives.

This two volume set LNAI 8102 and LNAI 8103 constitutes the refereed proceedings of the 6th International Conference on Intelligent Robotics and Applications, ICIRA 2013, held in Busan, South Korea, in September 2013. The 147 revised full papers presented were carefully reviewed and selected from 184 submissions. The papers discuss various topics from intelligent robotics, automation and mechatronics with particular emphasis on technical challenges associated with varied applications such as biomedical application, industrial automation, surveillance and sustainable mobility.

Contents: (1) Introduction; (2) Background: Deepwater Missions: Origin, and Structure of Deepwater Acquisition Effort; Deepwater Assets Planned for Acquisition; Fleet Mix Analysis; Examples of Deliveries of Deepwater Assets; Deepwater Acquisition Funding; Criticism of Deepwater Mgmt. in 2007; Coast Guard Reform Actions in 2007; Justice Dept. Invest.; (3) Oversight Issues for Congress: Management of Deepwater Programs in General: Cost Growth; Reporting of Costs and Planned Procurement Quantities; National Security Cutter; Sentinel Class Fast Response Cutter; 110/123-Foot Patrol Boat Modernization; Revolving Door and Potential for Conflicts of Interest; (4) Potential Options for Congress; (5) Legislative Activity in 111th Congress.

The Coast Guard Polar Security Cutter (PSC) program is a program to acquire three new PSCs (i.e., heavy polar icebreakers), to be followed years from now by the acquisition of up to three new medium polar icebreakers. The PSC program has received a total of \$1,169.6 million (i.e., about \$1.2 billion) in procurement funding through FY2020, including \$135 million in FY2020, which was \$100 million more than the \$35 million that the Coast Guard had requested for FY2020. With the funding it has received through FY2020, the first PSC is now fully funded and the second PSC has received initial funding.The Coast Guard's proposed FY2021 budget requests \$555 million in procurement funding for the PSC program. It also proposes a rescission of \$70 million in FY2020 funding that Congress had provided for the procurement of long lead time materials (L1TM) for a 12th National Security Cutter (NSC), with the intent of reprogramming that funding to the PSC program. The Coast Guard states that its proposed FY2021 budget, if approved by Congress, would fully fund the second PSC.The Coast Guard estimates the total procurement costs of the three PSCs as \$1,039 million (i.e., about \$1.0 billion) for the first ship, \$792 million for the second ship, and \$788 million for the third ship, for a combined estimated cost of \$2,619 million (i.e., about \$2.6 billion). Within those figures, the shipbuilder's portion of the total procurement cost is \$746 million for the first ship, \$544 million for the second ship, and \$535 million for the third ship, for a combined estimated shipbuilder's cost of \$1,825 million (i.e., about \$1.8 billion).

Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House."

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

The Coast Guard Polar Security Cutter (PSC) program is a program to acquire three new heavy polar icebreakers, to be followed years from now by the acquisition of up to three new medium polar icebreakers. On April 23, 2019, the Coast Guard-Navy Integrated Program Office for the PSC program awarded a \$745.9 million fixed-price, incentive-firm contract for the detail design and construction (DD&C) of the first PSC to VT Halter Marine of Pascagoula, MS, a shipyard owned by Singapore Technologies (ST) Engineering. VT Halter was the leader of one of three industry teams that competed for the DD&C contract. The first PSC is scheduled to begin construction in 2021 and be delivered in 2024, though the DD&C contract includes financial incentives for earlier delivery. The DD&C contract includes options for building the second and third PSCs. If these options are exercised, the total value of the contract would increase to \$1,942.8 million (i.e., about \$1.9 billion). The figures of \$745.9 million and \$1,942.8 million cover only the shipbuilder's costs; they do not include the cost of government-furnished equipment (GFE), which is equipment for the ships that the government purchases and then provides to the shipbuilder for incorporation into the ship, or government program-management costs. When GFE and government program-management costs are included, the total estimated procurement cost of the first PSC is between \$925 million and \$940 million, and the total estimated procurement cost of the three-ship PSC program is about \$2.95 billion.

The Arctic is an increasingly important region faced with major challenges caused not only by the effects of climate change, but also by a growing interest in its living and non-living resources, its attraction as a new destination for tourism, and as a route for navigation. It is not only the eight Arctic States that have paid an increased level of attention to the region; several non-Arctic actors from Asia and Europe also seek to gain more influence in the High North. At the same time, the evolving law and policy architecture for the Arctic region has recently played a more prominent role in the political and academic debate. Unlike Antarctica, where the coherent Antarctic Treaty System governs international cooperation, the legal regime of Arctic affairs is based on public international law, domestic law, and 'soft law'. These three pillars intersect and interact making Arctic governance multi-faceted and highly complex. This book provides an analytical introduction, a chronology of legally relevant events, and a selection of essential materials covering a wide range of issues-eg delineation and delimitation of maritime boundaries, environmental protection, indigenous peoples' rights, shipping, and fisheries. Included are multilateral and bilateral treaties, UN documents, official statements, informal instruments, domestic laws, and diplomatic correspondence.
