Are your trading results a little random? Do you find all progress is consistently wiped out by one big loss? One of biggest problems amongst new traders is the lack of understanding, when trading an active market all the numbers, graphs and activity often appears quite daunting. Especially when it means very little to you. With all the opportunity on offer it's hard not to get sucked in, but you fail time and again. It's important to understand the reasons behind market behaviour. In doing so, it allows us to identify situations and adapt should they change over time. Much like that saying goes: "Give a man a fish and you feed him for a day. Teach a man to fish and you feed him for a lifetime" The Guide is written without any additional 'padding' to make it clear and easy to understand quickly. Previous readers have reported a rapid change in results within a week. It's important to remember trading isn't just about winning large sums of money, it's about not losing too! After a first read, that alone should have an impact on your results. This guide is more than a strategy that works, it's the explanation behind what I do and why I consider certain indicators important!
