This edition brings up to date a decade of research work developments of the Faculty of Arts and Social Science, National University of Singapore, since the first volume was published in 1985. The state of the respective disciplines covered are reviewed in terms of notable theoretical and conceptual developments, major benchmarks during the past decade, and research lacunae that need to be addressed, as well as their substantive developments and contributions in the Singapore context and possible future directions, resulting in a collection of essays that places the Faculty's studies in an international comparative framework.

Harmony has become a major challenge for modern governance in the twenty-first century because of the multi-religious, multi-racial and multi-ethnic character of our increasingly globalized societies. Governments all over the world are facing growing pressure to integrate the many diverse elements and subcultures which make up modern pluralistic societies. This book examines the idea of harmony, and its place in politics and governance, both in theory and practice, in Asia, the West and elsewhere. It explores and analyses the meanings, mechanisms, dimensions and methodologies of harmony as a normative political ideal in both Western and Asian philosophical traditions. The book argues that in Western political thought - which sees politics as primarily concerned with resolving social conflicts and protecting individual rights - the concept of harmony has often been neglected. In contrast, since earliest times harmony or 'he' has been a profound theme in Confucian thought, and current leaders of many East Asian governments, and the Chinese government, have explicitly declared that the realisation of a harmonious society is their aim. The book also

assesses how harmony is pursued, jeopardized or deformed in the real world of politics, based upon empirical analysis of a variety of different cultural, social and political contexts, including: China, Hong Kong, Singapore, Malaysia, Singapore, Vietnam, Denmark, Latin America and the Scandinavian countries. It shows how harmony as an organizing concept can help to promote new thinking in governance, and overcome problems of modern-day governance like distrust, adversarial conflicts, hyper-individualism, coercive state intervention, and free-market alienation. It also discusses the potential problems posed by the pursuit of harmony, in particular in the grave threat of totalitarianism, and considers how these risks could best be mitigated.

beneath the surface to explore what really happens in Asian households. How do Asian parents think about childhood, family and education—and what can Western parents learn from them? Through interviews with hundreds of Asian parents and kids, Thiagarajan offers a detailed look at their values, hopes, fears and parenting styles. Woven into this narrative are her own reflections on teaching and parenting in Asia and the West. Thiagarajan synthesizes an extensive body of research to provide accessible and practical guidelines for parents. Each chapter ends with a "How To" section of specific tips for Asian and Western parents to aid their child's educational development both inside and outside the classroom.

"Where are you from?" An easy question for most to answer, but a very tough one for Third Culture Kids (TCKs). These children grow up outside their parents' home cultures, neither belonging entirely to their home culture nor to their host culture. They face unique challenges in establishing their identity and a sense of belonging, especially when returning to their home country. An increasing number of Singaporean families are living overseas for various reasons, and their children are growing up as TCKs. On returning to Singapore, these Singaporean TCKs will have to cope with a variety of re-entry stresses when adjusting to Singapore culture, making new friends, and continuing their education in the Singapore

education system. Many existing books about the TCK experience are written from the perspective of other cultures, chiefly the US. This book addresses some factors unique to the Singapore environment and provides Singaporean parents with suggestions to smooth their children's re-entry to Singapore. With experience drawn from the real-life experiences of the authors' children and others they know personally, this book will be helpful to families of TCKs through the whole process: preparing to leave Singapore, while overseas, and, especially, when they return.

This book systematically summarizes the author's more than 30 years of experience in teaching reform and educational research. The book is divided into three parts. Part I focuses on the comprehensiveness of thinking and the relationship between the coordinated development of thinking and the overall development of human beings. Part II and Part III mainly discuss the six basic principles of learning and thinking: the principle of the working memory of thinking, the principle of learning transfer, the principle of the basic process of learning, the principle of multi-level development of ability, the principle of sustainable development of learning, and the principle of subjectivity of learning. This book features the rules and characteristics of student learning with a student-centered approach, which can help teachers and educational researchers to better understand students and provide theoretical guidance for students' all-round development.
