The first edition of John Macquarrie's 'Principles of Christian Theology' was published in 1966; one of my systematic theology professors, who retired last year, told me this was a text he used when he was in graduate school, because at that time it was about the only contemporary text on theology that approached the subject from a broadly drawn but systematic approach, most others either being denominationally driven, or being the source texts (Calvin's 'Institutes', etc.).

The Bible itself reveals those doctrines that are essential to the Christian faith. They are 1) the Deity of Christ, 2) Salvation by Grace, 3) Resurrection of Christ, 4) the gospel, and 5) monotheism. These are the doctrines the Bible says are necessary. Though there are many other important doctrines, these five are the ones that are declared by Scripture to be essential (I call them primary essentials since the Bible declares them as essential).

"Principles of Christian Theology" is arguably his masterwork, a systematic theology in three parts, first published in 1966. Part One is a consideration of the need for a philosophical theology, in which he discusses human existence, revelation, God, theological language and a topology of religions.

1. Theology as Worship: Theology is fundamentally about knowing God. After all, that 's what the term means: the study of God. But we err when we think of this kind of knowing in purely cognitive terms, as though knowing God could be limited to some set of right statements we make about God.

He is known for his book *Theologiae Christianae Principia Mathematica* (Mathematical Principles of Christian Theology), published in 1698. In the aforementioned book, Craig presents a formula that describes how the probability of a historical event depends on the number of primary witnesses, on the chain of transmission through secondary witnesses, on the elapsed time and on the spatial distance.

First published in 1966, *Principles of Christian Theology* is recognized as a classic in its presentation of the major themes of Christian thought in contemporary terms. This edition now includes new or additional material on topics such as the individual and society, truth, demons, atonement, the Holy Spirit, the papacy, and collegiality. As noted theologian Robert McAfee Brown has said of Professor Macquarrie, possibly no one "has a greater ability to summarize and describe varying points of view with such scrupulous fairness and clarity, and yet maintain a distinctive position of his own." --

This text poses the question "what is theology?" and goes on to discuss issues of methodology, the relation of theology to other disciplines and different theological perspectives. It also investigates topics in the fields of philosophical theology (human existence; revelation; the language of theology; and Christianity and other religions), symbolic theology (triune God; doctrines of creation; the problem of evil and suffering; the person of Jesus Christ; and eschatology) and applied theology (the Church; ministry and mission; word and the sacraments; worship and prayer; and ethics).

Where do Christians get the information about what they believe? How do theologians know whether the doctrines they teach are made up of divine truth? For centuries believers have assumed that the Bible, consisting of the Old and New Testaments, is the origin of Christian knowledge. Over time, other sources were added to Scripture, such as philosophy, science, tradition and experience. - with the advent of modernity, philosophy and science led many Christian theologians to the idea that the documents comprising Scripture came out of human thinking and tradition. If the modern view was correct, Christian theology had no cognitive foundation; it was left groundless. Is there unique truth in Christianity? Do Christian doctrines describe real things to our minds? Or are they the result of imagination flowing through the traditions into which we are born? Is the modern view of the Bible's origin the final word on the matter? Or are the views of the classical church and of contemporary evangelicals viable in postmodern times? Should we think about the origin of Christian knowledge-the revelation and inspiration of Scripture-by constructing a new model to lead us beyond the limitations of present ideas? In *The Cognitive Principle of Christian Theology: A Postmodern View of Revelation-Inspiration*, Canale addresses not primarily the academic community, but the thinking community of the church, including administrators, pastors, theology students, and lay persons interested in

theological issues. He guides them step by step to understand the classical, modern, and evangelical models of revelation and inspiration by analyzing the hermeneutical presuppositions from which they come. The reader will see that each of these models fail in some way to integrate either what the Bible says about itself, or the facts of what we find on the written page. Then by using the same hermeneutical presuppositions biblical authors assumed when writing Scripture Canale develops an alternate model able to harmonize what Scripture teaches about itself with its actual characteristics as written work (phenomena of Scripture). The book ends by considering the consequences that the new historical cognitive model of revelation inspiration has for the interpretation of Scripture and its truthfulness.

First published in 1983, *Principles of Lutheran Theology* has guided students into theological reflection on the landmarks of Christian faith as understood in the Lutheran confessional heritage for a generation. The book sets forth the main principles of classical Lutheran theology but with an eschatological accent. Canon, confession, ecumenicity, Christ-centeredness, sacrament, law/ gospel, and two kingdoms are all examined not only in terms of their original meaning and historical development but also in light of current reflections. In this new edition, Braaten takes stock of the research and reflection of the last twenty-five years and also adds a chapter on the distinctive, Archimedean Lutheran insight into the hiddenness of God as a fount or ground of all theologizing. This new edition, cross-referenced to key readings in *Luther's Works* and *The Book of Concord*, will both equip and facilitate the search for a contemporary articulation of Christian identity in light of the church's historic commitments.

Origen's *On First Principles* is a foundational work in the development of Christian thought and doctrine: it is the first attempt in history at a systematic Christian theology. For over a decade it has been out of print with only expensive used copies available; now it is available at an affordable price and in a more accessible format. *On First Principles* is the most important surviving text written by third-century Church father, Origen. Origen wrote in a time when fundamental doctrines had not yet been fully articulated by the Church, and contributed to the very formation of Christianity. Readers see Origen grappling with the mysteries of salvation and brainstorming how they can be understood. This edition presents G. W. Butterworth's trusted translation in a new, more readable format, retains the introduction by Henri de Lubac, and includes a new foreword by John C. Cavadini. As St. Gregory of Nazianzus, Doctor of the Church, wrote: "Origen is the stone on which all of us were sharpened."

2012 Preaching Survey of the Year's Best Books for Preachers The appeal of biblical theology is that it provides a "big picture" that makes sense of the diversity of biblical literature. Through the lens of biblical theology the Bible ceases to be a mass of unconnected texts, but takes shape as a unified metanarrative connecting the story of Israel with that of Jesus. It presents the whole scene of God's revelation as one mighty plan of salvation. For fifty years Graeme Goldsworthy has been refining his understanding of biblical theology through his experiences as a student, pastor and teacher. In this valuable complement to his *Gospel-Centered Hermeneutics*, Goldsworthy defends and refines the rationale for his approach, drawing especially on the

work of Australian biblical scholar Donald Robinson.

An exemplary summary of the state of Catholic theology and what appears to be its future. This historical treatment of Catholic theology looks not to the content of that theology but rather to the form in which that content is contained and how it is expressed. Faithful to Catholic teaching yet critical, discerning yet impartial, Nichols offers this introduction to dogmatic theology, with the firm belief that dogmatics are the center of theology, and that any theological discipline which cuts itself off from these heartlands does so at its own peril. For it is in dogmatics that theology is in touch with the heart of revelation, and only by virtue of the quality of its contact with that revelation is thinking Christian at all. Though comprehensive and far-reaching, this work is not beyond the understanding of people just commencing a study of theology. It makes an excellent text for study groups.
