The Professional Development Plan (PDP) is a specific professional development model situated within the teacher evaluation system being implemented in the Owen Public Schools (pseudonym). The purpose of this study was to investigate the influence of school culture, school goals, and teacher collaboration on teachers' attitudes toward their Professional Development Plans. Data were also collected on teachers' perceptions of the steps of the PDP process to determine which steps had the greatest influence on teachers' attitudes toward their Professional Development Plans. The sample for this study was composed of 154 prekindergarten through high school teachers within one school district. Participants held a range of attitudes from very positive to very negative toward the Professional Development Plan. Significant correlations were found between teachers' attitudes toward the Professional Development Plan (TAPDP) and four out of the five factors of school culture - Collaborative ix Leadership, Teacher Collaboration, Professional Development and Unity of Purpose - were shown to be associated with teachers' attitudes toward the Professional Development Plan, although the relationships were not strong. Only the school culture factor Collegial Support was found not to be associated with teachers' attitudes toward the Professional Development Plan. Of the five school culture factors, only the factor Professional Development was a significant predictor of teachers' attitudes toward the Professional Development Plan. One aim of the research project was to discover the extent to which PDPs conducted individually and PDPs conducted collaboratively differed on teachers' attitudes toward the Professional Development Plan. The data showed a moderate effect size that suggested the variance in TAPDP scores was accounted for by whether a teacher collaborated with other teachers on a PDP or whether it was an individual effort. Another purpose of the research was to determine the extent to which PDPs aligned with school goals and PDPs not aligned with school goals differed on teachers' attitudes toward the Professional Development Plan. The data indicated a very large effect size and highlighted that a very large portion of the variance in TAPDP scores was accounted for by whether a teacher aligned the PDP with a school goal or whether the PDP had little or no alignment with a school goal. With regard to the steps of the PDP process, each of the four steps correlated positively with teachers' attitudes toward the Professional Development Plan. The strength of the relationship between TAPDP and Writing a Goal Statement was moderate, while strong relationships were evident for Describing Strategies/Activities for Reaching PDP Goals, Collecting Evidence of Progress on PDP and Reflecting on Evidence and Results of the PDP. Furthermore, when the steps of the PDP process were examined for their combined ability to predict TAPDP, two steps emerged as predictors. The two steps with the most influence on TAPDP were Describing Strategies/Activities for Reaching PDP Goals and Reflecting on Evidence and Results of PDP. Lastly, all of the demographic variables were found to be statistically nonsignificant for describing differences in TAPDP scores suggesting that years of teaching, educator role, gender, level of educational attainment and teaching level did not influence teachers' attitudes toward the Professional Development Plan.

Only 15% of employees worldwide are engaged at work. This represents a major barrier to productivity for organizations everywhere – and suggests a staggering waste of human potential. Why is this engagement number so low? There are many reasons — but resistance to rapid change is a big one, Gallup 's research and experience have discovered. In particular, organizations have been slow to adapt to breakthrough changes produced by information technology, globalization of markets for products and labor, the rise of the gig economy, and younger workers ' unique demands. Gallup 's 2017 State of the Global Workplace offers analytics and advice for organizational leaders in countries and regions around the globe who are trying to manage amid this rapid change. Grounded in decades of Gallup research and consulting worldwide -- and millions of interviews -- the report advises that leaders improve productivity by becoming far more employee-centered, build strengths-based organizations to unleash workers ' potential; and hire great managers to implement the positive change their organizations need not only to survive – but to thrive.

Offers school leaders guidance for designing and implementing a sustainable professional growth process, demonstrates how participants can develop individual action plans, and helps redefine school improvement efforts.

Since the original publication of Enhancing Professional Practice: A Framework for Teaching in 1996, thousands of educators in the United States and around the world have used the framework and its clear definition of the components of good teaching to structure their professional conversations and guide their practice. Building on those diverse experiences, Charlotte Danielson now provides specific guidance for teacher educators, teachers, administrators, and others who seek to use the framework to improve their programs and practice.

The use of instructional technology in twenty-first-century classrooms is not a subject to be debated. Rather, it needs to be embraced as a standard practice rather than an enriching activity. In Instructional Technology Tools: A Professional Development Plan, author L. Robert Furman presents a comprehensive guide to help educators embrace the use of instructional technology tools in the classroom. Answering the typical questions often posed by teachers and staff, Furman emphasizes the practical use of technology and introduces a breakthrough development called E-ProDev Days for offsite electronic professional development. He gives administrators the tools necessary to conduct fulfilling and meaningful professional development days, in-house or electronically, revolving around technology. Instructional Technology Tools: A Professional Development Plan also includes • professional development lesson plans; • tutorials for teachers and students; • sample sites where examples of each e-tool are available to share; • addresses to obtain the e-tools. Presenting a logical and practical approach to teaching a staff how to successfully use e-tools in their classroom, Instructional Technology Tools: A Professional Development Plan helps administrators help teachers to enhance their classrooms, manage time, organize themselves, and save money.
