A new Series of Multiple Choice Questions and Answers concentrating on specific subject areas within the Veterinary Nursing Curriculum.

• What causes hypertension in children? • Is it common for epileptic patients to have post-ictal vomiting? If so, how often does this occur? • Why is the incidence of parkinsonism less common in smokers? • What is the role of urine examination in diabetic control? Where do you turn to when you have a difficult medical question that needs answering? The 'Ask the Author' online feature from the best-selling textbook Kumar & Clark's Clinical Medicine has collected a wealth of questions and comments directly from medical students and doctors about topics that are of particular interest or difficulty to them. Kumar and Clark have brought together over 1000 of the questions they have been asked along with their answers. It will appeal to the many fans of Kumar & Clark, from first-year students to practising doctors, and will provide a useful and interesting sounding board to help ensure best practice. This unique book will provide you with a quick and easy way to discover the answers to your own medical questions...! The writing style is appealing and conversational, designed to entertain as well as instruct. Carries the 'Kumar & Clark' stamp of authority. All questions fully indexed for ease of reference. Covers topics that are easily misunderstood in medicine - good preparation for medical students, senior house officers/interns and specialists in training/residents preparing for written or oral exams.

The questions are divided into two sections - 100 scenario-based questions present clinical vignettes with questions to test students' knowledge within a specific context and 200 knowledge-based questions offering a wide mix and variety of questions encompassing all of the major medical and surgical specialties. Detailed answers and explanations will help to develop students' learning and understanding.

Covering all four critical care board exams (anesthesiology, surgery, internal medicine, and neurology), Critical Care Medicine Review: 1000 Questions and Answers prepares you for exam success as well as clinical practice in today's ICU. This full-color, easy-to-use review tool provides challenging case studies, relevant images, multiple-choice board-style questions, rationales for correct and incorrect answers, and references for every question. Edited by instructors of anesthesia and critical care from Harvard Medical School and Massachusetts General Hospital, this comprehensive resource is an ideal study guide for critical care fellows, recertifying practitioners, and CCRNs.

These medical school interview question and answers were created with my own experiences in my mind. They should help you think of the types of questions and answers that could come up in your med school interviews. items in your bag, you must first increase the number of items you have. These items already exist! You just have to dig them out of your memory; this book is your shovel! The following chapters consist of advice and insight about the medical school interview process and general pre-med advice. Customer Reviews: This book is extremely helpful! The sections about the interviews helped me feel as prepared as possible. The section about the premed process was very insightful. I wish I had read it before I got to college. I definitely recommend this book to anyone on a pre-health track! -Roger Khouri This book is the perfect companion for any student interested in the medical field. The author's vast knowledge and experience is evident by both the depth and sophistication of the sample questions and answers. Any student thinking of a career in medicine must read this book. Its insight is unparalleled. Sal Ektmi facilitates the daunting premed process, effectively assuaging apprehension one may feel regarding medical school interview preparation. -Corinne Tingir A must read for anyone interested in health school! My interview skills have increased drastically! -Raul Leal

The ninth edition of this best-selling textbook of clinical medicine builds even further on its formidable, prize-winning formula of excellence, comprehensiveness and accessibility. 'This book is stunning in its breadth and ease-of-use. It still remains the "gold standard", thorough guide to clinical medicine its forefathers were.' BMA Medical Book Awards judges. New to this edition: 2 new chapters: Global Health and Women's Health. 25 new authors. New online editor, Adam Feather, with a team of young doctors to augment the e-book which accompanies the print book with clinical tips, key learning points, drug tips, learning challenges, case studies and MCQs. Full text redesign to incorporate: New system overview diagrams for clinical chapters. New coloured headings to help identify content relating to disease, management, investigations etc. New icons to aid text navigation. 11 new members and a new co-editor, Senaka Rajapakse, of the International Advisory Board. Edited by Kumar and Clark, clinicians and educators of world-renowned expertise. Authors comprise consultants at the top of their fields, paired with younger doctors closer to the exam experience, to ensure authority and relevance. Enhanced e-book accompanies the print book, for ease of transportation and use on the move. International Advisory Board, led by Professor Janaka de Silva and Professor Senaka Rajapakse, providing guidance for global coverage from across the world. Contributions to the e-book by members of the International Advisory Board to amplify areas of clinical importance in their parts of the world

This book presents must-know facts generally not covered in "How To" books about medical writing. Every medical writer, whether a beginner or veteran, needs answers to questions many might not even know to ask. How does your personality type influence your writing behavior, and what can you do to make writing easier for you? What should you ask before agreeing to co-author an article for publication or write a

book chapter? What are some of the current issues regarding copyright and plagiarism that authors may face? What has research discovered about the quotations and references found in journal articles? What do you need to know about open access journals and predatory publishers? Dr. Taylor tells some surprising truths about medical publishing, including possible sources of peer review bias and some alarming influences on what ends up in print. He also relates little-known stories about renowned medical writers such as Sir William Osler, William Carlos Williams and Elisabeth Kübler-Ross and the origins of some of medicine's classic publications. What Every Medical Writer Needs to Know provides information vital for every health care professional who aspires to write for others to read: academicians and practicing physicians; nurses, nurse practitioners and physician assistants; and professional medical and scientific writers.

Intended for undergraduates, this book has been revised to reflect recent advances in medical knowledge, diagnosis and treatment. It includes a rewritten chapter on genetics and immunology, integrating molecular biology and expanded sections on STDs, diagnostic imaging techniques and rheumatology.

Whether you re a newly diagnosed Mesothelioma patient, a survivor, or a friend or relative of either, this book offers help. The only book to provide the doctor s and patient s views, 100 Questions & Answers About Mesothelioma, Third Edition gives you authoritative, practical answers to your questions about treatment options, post-treatment quality of life, sources of support, legal options, and much more. This outstanding team of authors -- led by a world-class lung disease expert -- provides an invaluable resource for anyone coping with the physical and emotional turmoil of this frightening disease."

This book provides a practical and comprehensive review of pain medicine in a clear and easy to apply question-answer format. Divided by topic, the book includes Q&As on Pain Basics, Psychology, Common Pain Syndromes, Medications, Pain Management in Special Populations and Interventional Pain. It is intended as a guide for residents and fellows and is written in such a manner to provide instantaneous feedback on correct answer choice and explanation for self-evaluation while preparing for written board examinations. Questions and Answers in Pain Medicine: A Guide to Board Exams fulfills the need for a resource that is similar to the Accreditation Council for Graduate Medical Education (ACGME) board examination in the US as well as international equivalents. It utilizes a fully Q&A approach which is how many students prefer to study. Written by a physician who has recently passed the ACGME written board exam and the founder of a pain management fellowship program for nearly 20 years, the authors provide valuable insight for successfully undertaking board examinations in pain medicine. .
