Defines the field of ethnic studies and explores its methodologies.

Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In *Unequal Treatment*, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene? *Unequal Treatment* offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. *Unequal Treatment* will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color.

In their later years, Americans of different racial and ethnic backgrounds are not in equally good-or equally poor-health. There is wide variation, but on average older Whites are healthier than older Blacks and tend to outlive them. But Whites tend to be in poorer health than Hispanics and Asian Americans. This volume documents the differentials and considers possible explanations. Selection processes play a role: selective migration, for instance, or selective survival to advanced ages. Health differentials originate early in life, possibly even before birth, and are affected by events and experiences throughout the life course. Differences in socioeconomic status, risk behavior, social relations, and health care all play a role. Separate chapters consider the contribution of such factors and the biopsychosocial mechanisms that link them to health. This volume provides the empirical evidence for the research agenda provided in the separate report of the Panel on Race, Ethnicity, and Health in Later Life.

Brings the subject matter of sociology to life for students. Linking theory and practice, this textbook explores how sociological knowledge is used in the community to fight for social change and justice.

Known for its clear and engaging writing, the bestselling *Race, Ethnicity, Gender, and Class* by Joseph F. Healey, Andi Stepnick, and Eileen O'Brien has been thoroughly updated to make it fresher, more relevant, and more accessible to undergraduates. The Eighth Edition retains the same use of sociological theory to tell the story of race and other socially constructed inequalities in the U.S. and for examining the variety of experiences within each minority group, particularly differences between those of men and women. This edition also puts greater emphasis on intersectionality, gender, and sexual orientation that will offer students a deeper understanding of diversity. New to this Edition New co-author Andi Stepnick adds fresh perspectives to the book from her teaching and research on race, gender, social movements, and popular culture. New coverage of intersectionality, gender, and sexual orientation offer students a deeper understanding of diversity in the U.S. The text has been thoroughly updated from hundreds of new sources to reflect the latest research, current events, and changes in U.S. society. 80 new and updated graphs, tables, maps, and graphics draw on a wide range of sources, including the U.S. Census, Gallup, and Pew. 35 new internet activities provide opportunities for students to apply concepts by exploring oral history archives, art exhibits, video clips, and other online sites.

This crucial contribution exposes the misconception that health research and health services are equally effective for all and highlights their failures in engaging with Black and Minority Ethnic (BME) groups. It provides essential case study examples on recruitment, engagement and partnerships with BME groups in research and public engagement.
