****THE TRUE STORY BEHIND MAJOR ITV DRAMA WHITE HOUSE FARM, NOW ON NETFLIX**** 'An extraordinary book . . . both deeply moving and quietly inspiring' **FREDDIE FOX** 'A beautiful, very moving book' **CRESSIDA BONAS** In 1985, the shocking murder of a family of five in a quiet country house in Essex rocked the nation. The victims were Nevill and June Bamber; their adopted daughter Sheila Caffell, divorced from her husband Colin; and Sheila and Colin's twin sons, Nicholas and Daniel. Only one survivor remained: the Bamber's other adopted child, Jeremy Bamber. Following his lead, the police - and later the press - blamed the murders on Sheila, who, so the story went, then committed suicide. Written by Sheila's ex-husband Colin and originally published in 1994, *In Search of the Rainbow's End* is the first and only book about the White House Farm murders to have been written by a family member. It is the inside story of two families into whose midst the most

monstrous events erupted. When Jeremy Bamber is later convicted on all five counts of murder, Colin is left to pick up the pieces of his life after not only burying his ex-wife, two children and parents-in-law, but also having to cope with memories of Sheila almost shattered by a predatory press hungry for stories of sex, drugs and the high life. Colin's tale is not just a rare insider's picture of murder, but testimony to the strength and resilience of one man in search of healing after trauma: he describes his process of recovery, a process that led to his working in prisons, helping to rehabilitate, among others, convicted murderers. By turns emotive, terrifying, and inspiring, Colin Caffell's account of mass murder and its aftermath will not fail to move and astonish.

Instant New York Times, USA Today, and Wall Street Journal Bestseller! An intimate and light-hearted memoir by viral sensation and three-time Emmy-nominated musical comedian Randy Rainbow that takes readers through his life—the highs, the lows, the lipstick, the pink glasses, and the show tunes. Randy Rainbow, the man who conquered the Internet with a stylish pair of pink glasses, an inexhaustible knowledge of Broadway musicals, and the most gimlet-eyed view of American politics this side of Mark Twain finally tells all in *Playing with Myself*, a memoir sure to cause more than a few readers to begin singing one of his greatest hits like “A Spoonful of Clorox” or “Cover Your Freakin’ Face.” As Randy has said, “There’s so much fake news out there about me. I can’t wait to set the record straight and finally give people a peek behind the green screen.” And set the

record straight he does. Playing with Myself is a first-hand account of the journey that led Randy Rainbow from his childhood as the over-imaginative, often misunderstood little boy who carried a purse in the second grade to his first job on Broadway as the host at Hooters and on to the creation of his trademark comedy character. In chapters titled "Pajama Bottoms" (a look back at the days when he wore pajama bottoms on his head to pretend he was Dorothy in The Wizard of Oz), "Yes, It's My Real Name, Shut Up!" (no explanation necessary...) and "Pink Glasses" (a rose-colored homage to his favorite accessory), Playing with Myself is a memoir that answers the question "Can an introverted musical theatre nerd with a MacBook and a dream save the world, one show tune at a time?"

Apartheid isn't over—so Malaika Wa Azania boldly argues in *Memoirs of a Born Free*, her account of growing up black in modern-day South Africa. Malaika was born in late 1991, as the white minority government was on its way out, making her a "Born Free"—the name given to the generation born after the end of apartheid. But Malaika's experience with institutionalized racism offers a view of South Africa that contradicts the implied racial liberation of the so-called Rainbow Nation. Recounting her upbringing in a black township racked by poverty and disease, the death of a beloved uncle at the hands of white police, and her alienation at multiracial schools, she evokes a country still held in thrall by de facto

apartheid. She takes us through her anger and disillusionment with the myth of black liberation to the birth and development of her dedication to the black consciousness movement, which continues to be a guiding force in her life. A trenchant, audacious, and ultimately hopeful narrative, *Memoirs of a Born Free* introduces an important new voice in South African—and, indeed, global—activism.

Four time Hugo Award winner Vernor Vinge has taken readers to the depths of space and into the far future in his bestselling novels *A Fire Upon the Deep* and *A Deepness in the Sky*. Now, he has written a science-fiction thriller set in a place and time as exciting and strange as any far-future world: San Diego, California, 2025. Robert Gu is a recovering Alzheimer's patient. The world that he remembers was much as we know it today. Now, as he regains his faculties through a cure developed during the years of his near-fatal decline, he discovers that the world has changed and so has his place in it. He was a world-renowned poet. Now he is seventy-five years old, though by a medical miracle he looks much younger, and he's starting over, for the first time unsure of his poetic gifts. Living with his son's family, he has no choice but to learn how to cope with a new information age in which the virtual and the real are a seamless continuum, layers of reality built on digital views seen by a single person or millions, depending on your choice. But the consensus reality of the digital world is available only if, like his thirteen-year-old granddaughter Miri, you know how to wear your wireless access—through nodes designed into smart clothes—and to see the digital context—through smart contact

lenses. With knowledge comes risk. When Robert begins to re-train at Fairmont High, learning with other older people what is second nature to Miri and other teens at school, he unwittingly becomes part of a wide-ranging conspiracy to use technology as a tool for world domination. In a world where every computer chip has Homeland Security built-in, this conspiracy is something that baffles even the most sophisticated security analysts, including Robert's son and daughter-in law, two top people in the U.S. military. And even Miri, in her attempts to protect her grandfather, may be entangled in the plot. As Robert becomes more deeply involved in conspiracy, he is shocked to learn of a radical change planned for the UCSD Geisel Library; all the books there, and worldwide, would cease to physically exist. He and his fellow re-trainees feel compelled to join protests against the change. With forces around the world converging on San Diego, both the conspiracy and the protest climax in a spectacular moment as unique and satisfying as it is unexpected. This is science fiction at its very best, by a master storyteller at his peak. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
