F stands for "funny" in this perfect gift for students or anyone who has ever had to struggle through a test and needs a good laugh. Celebrating the creative side of failure in a way we can all relate to, F in Exams gathers the most hilarious and inventive test answers provided by students who, faced with a question they have no hope of getting right, decide to have a little fun instead. Whether in science (Q: What is the highest frequency noise that a human can register? A: Mariah Carey), the humanities (Q: What did Mahatma Gandhi and Genghis Khan have in common? A: Unusual names), math, or other subjects, these 250 entries prove that while everyone enjoys the spectacle of failure, it's even sweeter to see a FAIL turn into a WIN.

From the author of the national bestseller F in Exams comes a brand new compendium of hilarious and inventive wrong test answers and homework hiccups. Featuring gems from elementary school ("two halves make a whale"), middle grades (Q: What does "germinate" mean? A: To become a German citizen), and high school (Q: Fossil fuels are usually associated with which major type of rock? A: Classic rock), these 250 examples of creative invention are sure to charm anyone who has had to bluff or blunder their way through a test. Plus, this is a fixed-format version of the book, which looks nearly identical to the print version.

The ultimate compendium of the international and New York Times bestselling series, this fun omnibus features the complete content from all four books—F in Exams, F for Effort, F this Test, and F in Exams: Pop Quiz—plus more than 100 brand-new, sadly real, hilariously wrong student answers (Q: What is

the role of a catalyst in a chemical reaction? A: It lists the cats involved). Also including bonus trivia in the form of "Stuff They Should Have Taught Us in School" facts (did you know a sneeze can travel up to 100 MPH?), this A+ collection will amuse anyone facing down a test as well as those happy to have the classroom behind them.

Features humorous but incorrect answers to challenging test questions in biology, physics, chemistry, psychology, English, history, business, geography, and technology.

Will some students ever learn from their mistakes? We hope not! This all-new collection of hilarious, totally wrong, real test answers serves a fresh batch of A+ wit misapplied to F- quiz scores. A little studying would reveal that the most powerful light source known to man isn't lightsabers

Q: What happens to a boy when he reaches puberty? A: He says goodbye to childhood and enters adultery. Q: How can you prevent milk turning sour? A: Keep it in the cow. We've all been there. You've been studying hard, the day of the BIG test arrives, you turn over the paper, and 'what the \*&%@ does that mean?!' Not a clue. Some students, rather than admit defeat, choose to adopt a more creative approach to answering those particularly awkward exam questions. Packed full of hilarious examples, this book will bring a smile to the face of teachers, parents and students alike - and anyone who's ever had to sit a test.

If the scrawl of red pen and a note from teacher to 'see me after class' are familiar memories from your school days, then you are not alone. In School Fail, readers will find a fantastic selection of the side-splitting bloopers, mistakes and misunderstandings that kids have boldly come out with in their school work: from the innocent mispronunciations of younger children, to the facetious, inventive, or just downright stupid remarks of older students who should know better. For example: Q: Name the four seasons. A: Salt, pepper, mustard and vinegar; 'John Milton wrote Paradise Lost. Then his wife died and he wrote Paradise Regained.'; 'The earth is surrounded by the moon, the sun, Mars and Penis.' Ridiculously funny and endlessly entertaining, School Fail celebrates the unique - and usually entirely unintentional - humour of students everywhere, guaranteed to have readers of any age howling in disbelief.

From the same hilarious wellspring of failure as the bestselling F in Exams and F for Effort comes this all-new collection of inventively wrong—yet totally real—test responses by students who don't know the answer, but come up with something better instead. Featuring crucial academic subjects including English (Q: Name a key theme in Madame Bovary; A: Cows), Geography (Q: Where can you find the Andes?; A: Google Earth), Science (Q: Describe the properties of a meteor; A: An animal that only eats meat) and more, F this Test rounds out the curriculum with an extra-credit section for those tricky elective courses, and demonstrates that it's more fun to laugh when faced with an absolute fail.

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.
