Traces the harrowing experiences of diving companions David Shaw and Don Shirley, whose 2005 underwater recovery endeavor in Africa's dangerous Bushman's Hole crater resulted in one of their deaths and the near escape of the other. 25,000 first printing.

Golden lion tamarins are found only in Brazilian forests. These small, remarkable monkeys once had plenty of space to roam and claim family territories. But years of deforestation caused their numbers to shrink. They were in serious danger of becoming extinct. To help, scientists studied the animals in zoo settings. But they faced several mysteries. Why weren't golden lion tamarins reproducing in zoos? If scientists reintroduced zoo-raised tamarins to the wild, would those monkeys survive? And how could scientists give tamarins enough forest area for the population to grow? Find out how scientists and concerned citizens worked together to give golden lion tamarins a hopeful future.

Written by two experts in diving physiology and medicine, this comprehensive resource will help you manage each stage of a dive more safely and successfully. Whether you're on the surface or bottom, in the descent or ascent, you'll know exactly what to do and when to do it. With information on everything from on-gassing and off-gassing to first response interventions for medical problems, Diving Science is as essential as a wetsuit for your next dive.

On December 7, 1941, as the great battleships Arizona, Oklahoma, and Utah lie paralyzed and burning in the aftermath of the Japanese attack on Pearl Harbor, a crack team of U.S. Navy salvage divers headed by Edward C. Raymer are hurriedly flown to Oahu from the mainland. The divers have been given a Herculean task: rescue the sailors and Marines trapped below, and resurrect the pride of the Pacific fleet. Now for the first time, the chief diver of the Pearl Harbor salvage operations, Cmdr. Edward C. Raymer, USN (Ret.), tells the whole story of the desperate attempts to save crewmembers caught inside their sinking ships. *Descent into Darkness* is the only book available that describes the raising and salvage operations of sunken battleships following the December 7th attack. Once Raymer and his crew of divers entered the interiors of the sunken shipwrecks—attempting untested and potentially deadly diving techniques—they experienced a world of total blackness, unable to see even the faceplates of their helmets. By memorizing the ships' blueprints and using their sense of touch, the divers groped their way hundreds of feet inside the sunken vessels to make repairs and salvage vital war material. The divers learned how to cope with such unseen dangers as falling objects, sharks, the eerie presence of floating human bodies, and the constant threat of Japanese attacks from above. Though many of these divers were killed or seriously injured during the wartime salvage operations, on the whole they had great success performing what

seemed to be impossible jobs. Among their credits, Raymer ' s crew raised the sunken battleships USS West Virginia, USS Nevada, USS California, After Pearl Harbor they moved on to other crucial salvage work off Guadalcanal and the sites of other great sea battles.

“ Heart-stopping and relentlessly gripping. Tabor takes us on an odyssey into unfathomable worlds beneath us, and into the hearts of rare explorers who will do anything to get there first. ” —Robert Kurson, author of *Shadow Divers* In 2004, two great scientist-explorers attempted to find the bottom of the world. American Bill Stone took on the vast, deadly Cheve Cave in southern Mexico. Ukrainian Alexander Klimchouk targeted Krubera, a freezing nightmare of a supercave in the war-torn former Soviet republic of Georgia. Both men spent months almost two vertical miles deep, contending with thousand-foot drops, raging whitewater rivers, monstrous waterfalls, mile-long belly crawls, and the psychological horrors produced by weeks in absolute darkness, beyond all hope of rescue. Based on his unprecedented access to logs and journals as well as hours of personal interviews, James Tabor has crafted a thrilling exploration of man ' s timeless urge to discover—and of two extraordinary men whose pursuit of greatness led them to the heights of triumph and the depths of tragedy. *Blind Descent* is an unforgettable addition to the classic literature of true-life adventure, and a testament to human survival and endurance. “ Holds the reader to his seat, containing dangers aplenty with deadly falls, killer microbes, sudden burial, asphyxiation, claustrophobia, anxiety, and hallucinations far underneath the ground in a lightless world. Using a pulse-pounding narrative, this is tense real-life adventure pitting two master cavers mirroring the cold war with very uncommonly high stakes. ” —Publishers Weekly (starred review) “ A fascinating and informative introduction to the sport of cave diving, as well as a dramatic portrayal of a significant man-vs.-nature conflict. . . . What counts is Tabor ' s knack for maximizing dramatic potential, while also managing to be informative and attentive to the major personalities associated with the most important cave explorations of the last two decades. ” —Kirkus Reviews

This book provides practical, up-to-date information on training, team management, equipment, and techniques for ice rescue teams.
