The public assumes the researcher spends the day dreaming up and trying out creative ideas. In reality, proposal development is an invisible but critical barrier over which even a good researcher may tumble. This book is intended to lower that barrier. It should increase first-trial recognition of good ideas and ensure that rejections do not result because a proposal poorly represented either the ideas, the investigator, or both.

This book provides information about the key areas needed for a successful project. It includes software skills, developing research objectives, writing proposals, literature reviews, getting ethics approval, seeking funding, managing a project, communicating research findings, and writing reports. There is also a chapter on working as an independent researcher. The book includes numerous examples, checklists, and practical exercises designed to assist the learning of research skills and the completion of crucial project tasks. It covers procedures needed for conducting projects electronically and accessing information from the Internet.
