Companies are leveraging the power of big data and are tasked with putting an infrastructure in place that will allow for the analysis of this data. One essential piece of that infrastructure is the data warehouse (DWH). This book offers a comprehensive introduction to SAP Business Warehouse (BW). You'll learn about the primary features and functions of SAP NetWeaver BW, including architecture, data modeling, data extraction, data staging, and reporting. Learn about the different types of InfoProviders available in SAP BW and get a detailed understanding of InfoObjects and InfoCubes. Walk through the ETL process and best practices for administering InfoCubes and DataStore objects. Get tips on how to optimize data access using aggregates and statistics. By using practical examples, tips, and screenshots, the author brings readers new to SAP BW up to speed on the fundamentals and best practices for providing reports to users. • Tips for loading data from a source system to SAP BW with SAP ETL • How to automate ETL tasks using process chains • Using SAP BW Business Content to accelerate the design of your BW objects • Leverage BEx Query Designer and BEx Analyzer

This much anticipated reference makes an excellent addition to your SAP BW Library. Read this book and you'll discover a comprehensive guide to configuring, executing, and optimizing data retrieval in SAP BW. The author takes you, step-by-step, through all of the essential data collection activities and helps you hit the ground running with master data, transaction data, and SAP Business Content. Expert insights and practical guidance help you to optimize these three factors and build a successful, efficient ETL (extraction, transformation, loading) process. This all-new edition is based on the current SAP BW Release 3.5, but remains a highly valuable resource for those still using previous versions.

"Ready for SAP BW/4HANA 2.0? This comprehensive guide will teach you all there is to know about the next generation business warehouse from SAP!
