The Picts is a survey of the historical and cultural developments in northern Britain between AD 300 and AD 900. Discarding the popular view of the Picts as savages, they are revealed to have been politically successful and culturally adaptive members of the medieval European world. Re-interprets our definition of 'Pict' and provides a vivid depiction of their political and military organization. Offers an up-to-date overview of Pictish life within the environment of northern Britain. Explains how art such as the 'symbol stones' are historical records as well as evidence of creative inspiration. Draws on a range of transnational and comparative scholarship to place the Picts in their European context.

Articles on all the religions of the world and the great systems of ethics; on every religious belief or custom and ethical movement; on every philosophical idea and moral practice. The Encyclopaedia embraces the whole range of theology and philosophy, together with aspects of anthropology, mythology, folklore, biology, psychology, economics and sociology. Every article has been prepared by specialists. Includes bibliographies and index.

Are you ready for the latest process integration solution from SAP? Meet SAP Process Orchestration! This is your complete guide to the tools and components of SAP PO. Learn how to build and configure interfaces and use SAP BPM to manage your business processes. Thanks to both a practical and comprehensive approach, you'll find out how to configure the System Landscape Directory, create an iFlow, monitor message processing, create BPM processes, and so much more.

This book looks at the evolution of rural settlement in Scotland from the Mesolithic period through to the improving movement of the 18th and 19th centuries. The main emphasis is on changes in society and technology, but the book also considers how the development of the physical landscape laid the foundation for such changes. The author strikes a balance between general perspectives (including relevant contextual materials such as the political structures) and local studies, with much emphasis on individual sites. Lack of documentation prior to the 10th century places particular importance on the archaeological evidence, but imaginative interpretation of this evidence has led to a major re-evaluation. Ideas emphasizing continuity of settlement and local adaptation are replacing older 'invasionist' theories emphasizing Celtic war lords and broch-building pirates.

For the Romans, Britannia lay beyond the comfortable confines of the Mediterranean world around which classical civilisation had flourished. Britannia was felt to be at the outermost edge of the world

itself, lending the island an air of dangerous mystique. To the soldiers crossing the Oceanus Britannicus in the late summer of AD 43, the prospect of invading an island believed to be on its periphery must have meant a mixture of panic and promise. These men were part of a formidable army of four veteran legions (II Augusta, VIII Hispana, XIII Gemina, XX Valeria), which had been assembled under the overall command of Aulus Plautius Silvanus. Under him were, significantly, first-rate legionary commanders, including the future emperor Titus Flavius Vespasianus. With the auxiliary units, the total invasion force probably mounted to around 40,000 men, but having assembled at Gessoriacum (Boulogne) they refused to embark. Eventually, the mutinous atmosphere was dispelled, and the invasion fleet sailed in three contingents. So, ninety-seven years after Caius Iulius Caesar, the Roman army landed in south-eastern Britannia. After a brisk summer campaign, a province was established behind a frontier zone running from what is now Lyme Bay on the Dorset coast to the Humber estuary. Though the territory overrun during the first campaign season was undoubtedly small, it laid the foundations for the Roman conquest which would soon begin to sweep across Britannia. In this highly illustrated and detailed title, Nic Fields tells the full story of the invasion which established the Romans in Britain, explaining how and why the initial Claudian invasion succeeded and what this meant for the future of Britain.

First mentioned by name in AD 297, the Picts inhabited Northern Britain from the end of the 3rd century AD to the 9th. They rose to power in the devastation following Emperor Septimus Severus's repression of the Caledonians in AD 208, and dominated Northern Britain for over 500 years, before vanishing mysteriously. The Picts represent a high point of Celtic civilisation, remaining free and unconquered beyond the borders of the Roman world, and rising to become the first barbarians to form a recognisable 'nation'. This title takes a detailed look at their origins, and examines Pictish heroic and warrior society, covering education and training, appearance and equipment, the status of women, and the experience of battle.

• Understand the Basis system's inner workings to quickly address critical situations• Get step-by-step instructions and practical tips on administration• Explore new information on SAP Solution Manager 7.1, enhancement packages, and the new monitoring infrastructure• 4th edition, updated and expandedIn the fourth edition of this flagship reference, you'll find updated, expanded, and revised information of the most important administration topics for SAP NetWeaver Application Server ABAP. A field guide devoid of jargon, this expansive and educational tool documents the integration of vegetation regions and the distribution of woody plants in the highly diverse Cape region of South Africa. Developed for the general public, this extensively researched manual identifies the most striking features in trees and shrubs so that a complex system for keying the landscape is unnecessary. From the rocky and dry Richtersveld in the west to the Kalahari sands and the arid Karoo, this handbook makes the region's foliage instantly recognizable and classifiable.
