"A rich history of a company whose cars, for better and worse, have touched millions of lives, a character study of a brilliant but deeply flawed leader, and a case study in how a corporate culture can turn toxic." —Bethany McLean, New York Times Book Review *Faster, Higher, Farther* chronicles a corporate scandal that rivals those at Enron and Lehman Brothers—one that will cost Volkswagen more than \$22 billion in fines and settlements. Through meticulous reporting, New York Times correspondent Jack Ewing documents why VW felt compelled to install "defeat devices" in diesel vehicles that unlawfully lowered CO2 levels during emissions testing, and how the fraud was committed, covered up, and finally detected. *Faster, Higher, Farther* is a briskly written account of unrivaled corporate greed. Updated with the latest information and a new afterword by the author.

TRB Special Report 207: Transportation Professionals: Future Needs and Opportunities Aware assesses future professional needs in highway and mass transit agencies in federal, state, and local government. This study also examines the role of consulting firms in satisfying the future professional requirements of highway and transit agencies. A large number of professionals who entered highway and mass transit organizations during the past 30 years are expected to retire soon, particularly those who helped build the nation's Interstate system. Unless there is careful planning, this loss of professional capability could impair the ability of these agencies to maintain the nations's transportation system effectively.

Primarily intended for the undergraduate and postgraduate students of management, the book can also be of immense help to the students of commerce, science and economics. The contents of the book cover the syllabi of various Indian universities and B-schools. The book is the outcome of the extensive teaching experience of the authors in various management schools. The text encompasses topics on descriptive statistics and averages, probability and Bayes' theorem, distributions, sampling techniques, significance tests, chi-square tests and ANOVA. Besides, the book also acquaints the readers with the regression and correlation, and time series and index numbers.

Distinguishing Features of the book

- Statistics answers your questions in the beginning of each chapter outlines various areas of applications of statistics.
- Various supplementary examples aid the students in gaining a thorough understanding of the discussed concept.
- The case studies use real, recent and easily understandable data collected from various sources that acquaint the students with the real-life situations.
- The self-test and exercises given at the end of each chapter test students' comprehension of various underlying concepts and principles.
- Answers to self-test and hints to exercises are also provided.
