My flagship defense of a naturalist worldview (and of philosophy in general), Sense and Goodness without God: A Defense of Metaphysical Naturalism, is now available as an audio book, through Audible.com. It's a fairly faithful reading, so even things I'd probably change now (mostly minor stuff) is still in there (I didn't want to deviate too much into creating a second edition just yet), but I still had to leave out many of the internal cross references and all the bibliographies.

Sense & Goodness Without God (review index)

I'm blogging my way through Sense and Goodness Without God, Richard Carrier's handy worldview-in-a-box for atheists. (See the post index for all sections.) It is now time to give my final thoughts on Carrier's book. Carrier's book is a godsend to fresh new atheists who know they were wrong about God and now aren't sure how everything else is supposed to fit together without a God in the picture.

Sense and Goodness Without God: Final thoughts

by Richard Carrier on March 7, 2016 9 Comments. My first book, Sense and Goodness without God, was completed in 2003 and published in 2005. Since then I have collected a long list of corrections (mostly typos, a few clarifications or improved wording, and updates to all the bibliographies) that I would certainly make if I ever do a second edition. I likely won't, because I'm planning a new, shorter, popular market version—which will simply reference this one.

Is Goodness Without God Good Enough contains a lively debate between William Lane Craig and Paul Kurtz on the relationship between God and ethics, followed by seven new essays that both comment on the debate and advance the broader discussion of this important issue. Written in an accessible style by eminent scholars, this book will appeal to students and academics alike.

An inspiring and provocative exploration of an alternative to traditional religion Questions about the role of God and religion in today's world have never been more relevant or felt more powerfully. Many of us are searching for a place where we can find not only facts and scientific reason but also hope and moral courage. For some, answers are found in the divine. For others, including the New Atheists, religion is an "enemy." But in Good Without God, Greg Epstein presents another, more balanced and inclusive response: Humanism. He highlights humanity's potential for goodness and the ways in which Humanists lead lives of purpose and compassion. Humanism can offer the sense of community we want and often need in good times and bad—and it teaches us that we can lead good and moral lives without the supernatural, without higher powers . . . without God.

In his last book, Ronald Dworkin addresses timeless questions: What is religion and what is God's place in it? What are death and immortality? He joins a sense of cosmic mystery and beauty to the claim that value is objective, independent of mind, and immanent in the world. Belief in God is one manifestation of this view, but not the only one.

Dr. Richard Carrier explains the four reasons he does not accept the Christian religion, describing four facts of the world that, had they been different, he would believe. He is brief, clear, and down to earth, covering the whole topic in easy-to-read explanation.--[book cover]

Throughout the Roman Empire Cities held public speeches and lectures, had libraries, and teachers and professors in the sciences and the humanities, some subsidized by the state. There even existed something equivalent to universities, and medical and engineering schools. What were they like? What did they teach? Who got to attend them? In the first treatment of this subject ever published, Dr. Richard Carrier answers all these questions and more, describing the entire education system of the early Roman Empire, with a unique emphasis on the quality and quantity of its science content. He also compares pagan attitudes toward the Roman system of education with the very different attitudes of ancient Jews and Christians, finding stark contrasts that would set the stage for the coming Dark Ages.

A recent string of popular-level books written by the New Atheists have leveled the accusation that the God of the Old Testament is nothing but a bully, a murderer, and a cosmic child abuser. This viewpoint is even making inroads into the church. How are Christians to respond to such accusations? And how are we to reconcile the seemingly disconnected natures of God portrayed in the two testaments? In this timely and readable book, apologist Paul Copan takes on some of the most vexing accusations of our time, including: God is arrogant and jealous God punishes people too harshly God is guilty of ethnic cleansing God oppresses women God endorses slavery Christianity causes violence and more Copan not only answers God's critics, he also shows how to read both the Old and New Testaments faithfully, seeing an unchanging, righteous, and loving God in both.

Argues that the increasing power of Christian fundamentalists in American politics threatens the country's citizens, blames the Bible for promoting intolerance of other faiths, and describes atheism as "an admission of the obvious."

Christopher Hitchens, described in the London Observer as "one of the most prolific, as well as brilliant, journalists of our time" takes on his biggest subject yet—the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell's *Why I Am Not a Christian* and Sam Harris's recent bestseller, *The End Of Faith*, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos.

With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope's awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix.

In this extensive sequel to *Science Education in the Early Roman Empire*, Dr. Richard Carrier explores the social history of scientists in the Roman era. Was science in decline or experiencing a revival under the Romans? What was an ancient scientist thought to be and do? Who were they, and who funded their research? And how did pagans differ from their Christian peers in their views toward science and scientists? Some have claimed Christianity valued them more than their pagan forebears. In fact the reverse is the case. And this difference in values had a catastrophic effect on the future of humanity. The Romans may have been just a century or two away from experiencing a scientific revolution. But once in power, Christianity kept that progress on hold for a thousand years—while forgetting most of what the pagans had achieved and discovered, from an empirical anatomy, physiology, and brain science to an experimental physics of water, gravity, and air. Thoroughly referenced and painstakingly researched, this volume is a must for anyone who wants to learn how far we once got, and why we took so long to get to where we are today.
