Seth dictates his startling view of the universe through channeler Jane Roberts.

Seth is the acclaimed non-physical teacher whose collected works are the most dynamic, brilliant and undistorted map of inner reality and human potential available today. His articulation of the furthest reaches of human potential, the eternal validity of the soul, and the concept that we create our own reality according to our beliefs, has been presented in books that have sold over 8 million copies and been translated into over a dozen languages. Seth's empowering voice clearly stands out as one of the major forces which led to the current New Age philosophical movement. This book chronicles Seth's first contact with author and medium Jane Roberts. It is a mixture of great Seth excerpts, selected by topic, and further explained by Jane. Topics covered include: afterdeath & between lives, how to get rid of illness, reincarnation, why people are born into different circumstances, God, All That Is, Dreams, exercises to develop the inner senses, and much more.

Considered the most brilliant map of one's inner reality.

Seth has repeatedly stressed the concept that we create our own reality according to our individual beliefs. But how do our realities merge and combine to form mass reactions such as the overthrow of governments, the birth of a new religion, wars, epidemics, earthquakes, and new periods of art, architecture, and technology? In this pioneering work, Seth explores the connection between personal beliefs and world events. He pinpoints the unconscious, and often negative, beliefs pervading science and religion, medicine and mythology, and offers thought-provoking reflections on Darwinism, Freudianism, religions, cults, and medical beliefs. With fascinating implications, Seth asserts that the personal impulses we are often taught to see as dangerous, chaotic, or contradictory, are instead crucial to the best interests of the species and the natural world, for they lead us to live “ not only as loving caretakers, but as partners with other species. ” “ Only people who trust their spontaneous impulses can be consciously wise enough to choose from a myriad of probably futures the most promising events.... ” — Jane Roberts, Speaking for Seth

Volume One of two volumes Exploring the interdependence of multiple selves, Seth explains how understanding unknown dimensions can change the world as we know it. Readers are invited to discover their own unknown realities through a series of exercises.

The Way Toward Health is an in-depth examination of the miracle of life in a human body, woven through the poignant story of Jane Roberts ' courageous attempt to understand why she had contracted the crippling condition that ultimately led to her death. The material in the book was evoked by the questions and considerations Jane and her husband Rob faced during her long illness. Expanding upon those questions, Seth discusses: • Why medicine and therapy often perpetuate illness • How the practice of naming diseases can work against us • The influence of religion in creating disease • How childrens ' health is influenced by parents ' beliefs • Humor as an effective factor in healing • The mechanics of self-healing: how our thoughts and beliefs affect our health • The creative aspects of illness: how we sometimes contract an illness to give ourselves time to understand and integrate our life experiences
