Prepared by the Environmental Technology Evaluation Center (EvTEC), a CERF Service Center. This report describes the nature and scope of an environmental evaluation of ThermoEnergy Corporation’s Ammonia Recovery Process (ARP) System, a method for recycling ammonia in wastewater. The data in this report were collected over a three-month pilot study.ØTests found that the ARP system is capable of removing 75?99% of the ammonia in the waste stream in a domestic wastewater treatment plant. The ARP System uses a series of absorption, evaporation, and crystallization steps to convert ammonia in wastewater into a commercial fertilizer, ammonium sulfate. The evaluation results clearly indicate that the ARP process is capable of achieving significant ammonia reduction under a range of environmental conditions

A course-changing event in one’s life can happen in minutes. Or it can form slowly, a primitive webbing splaying into fingers of discontent, a minuscule trail hardening into the sinewed spine of resentment. So it was with the mill workers as the heat-soaked days of summer marched on. City girl Jessie, orphaned at sixteen, struggles to adjust to life with her barely known aunt and uncle in the tiny town of Bradleyville, Kentucky. Eight years later (1968), she plans on leaving–to follow in her revered mother’s footsteps of serving the homeless. But the peaceful town she’s come to love is about to be tragically shattered. Threats of a labor strike rumble through the streets, and Jessie’s new love and her uncle are swept into the maelstrom. Caught between the pacifist teachings of her mother and these two men, Jessie desperately tries to deny that Bradleyville is rolling toward violence and destruction.

Reporting U.S.-European Relations: Four Nations, Four Newspapers is a compilation of U.S. and European perspectives from different daily newspapers. Chapter 1 is about the Frankfurter Allgemeine Zeitung (FAZ). After a brief background of the newspaper, from one dictator to another, the paper is described as having no editor. The political, economic, and cultural policies are made by ""editor-publishers."" Political philosophy in the FAZ is very cohesive and conservative, which readers of a wide political spectrum rely upon. Chapter 2 deals with the New York Times, which is founded in 1851 and has undergone many changes, making it the most respected daily newspaper in the United States. This circulation is considered a chronologist of current events, and more than an opinion maker, it is also considered an educator. Chapter 3 is about The Times (London), founded in 1785 under a different name. This circulation is one of the most influential newspapers in the world, with a succession of notable editors. Considered by some as boring, this newspaper is bought by Rupert Murdoch, making it still in substance a uniquely British expression of life. Chapter 4 is about Le Monde, founded in December 1944 upon the request of General Charles de Gaulle. This circulation is considered the most important and prestigious daily newspaper in France, very nationalistic, and a receptacle for debate. This collection of essays will prove invaluable to practicing journalists, politicians, public and government leaders, and students of journalism. Writers and authors will also find this collection entertaining and informative.

-WITH SIXTEEN DRAWINGS BY AUBREY BEARDSLEY Salome (French: Salomé, pronounced: [salome]) is a tragedy by Oscar Wilde. The original 1891 version of the play was in French. Three years later an English translation was published. The play tells in one act the Biblical story of Salome, stepdaughter of the tetrarch Herod Antipas, who, to her stepfather’s dismay but to the delight of her mother Herodias, requests the head of Jokanaan (John the Baptist) on a silver platter as a reward for dancing the dance of the seven veils. Wilde had considered the subject since he had first been introduced to Hérodias, one of Flaubert’s Trois Contes, by Walter Pater, at Oxford in 1877. His interest had been further stimulated by descriptions of Gustave Moreau’s paintings of Salome in Joris-Karl Huysmans’s À rebours. Other literary influences include Heinrich Heine’s Atta Troll, Laforgue’s Salomé in Moralités Légendaires and Mallarmé’s Hérodiade. Wilde’s interest in Salomé’s image had been stimulated by descriptions of Gustave Moreau’s paintings in Joris-Karl Huysmans’s À rebours. Many view Wilde’s Salomé as a superb composite of these earlier treatments of the theme overlaid, in terms of dramatic influences, with Belgian playwright Maurice Maeterlinck’s characteristic methodical diction,[clarification needed] and specifically Maeterlinck’s La Princesse Maleine. "with its use of colour, sound, dance, visual description and visual effect".[8] Wilde often referred to the play in musical terms and believed that recurring phrases "bind it together like a piece of music with recurring motifs." Although the "kissing of the head" element was used in Heine and even Heywood's[who?] production, Wilde’s ingenuity was to move it to the play’s climax. While his debts are undeniable, there are some interesting contributions in Wilde’s treatment, most notably being his persistent use of parallels between Salomé and the moon. Scholars like Christopher Nassaar point out that Wilde employs a number of the images favored by Israel’s kingly poets and that the moon is meant to suggest the pagan goddess Cybele, who, like Salomé, was obsessed with preserving her virginity and thus took pleasure in destroying male sexuality. Following the prelude three demarcated episodes follow: the meeting between Salome and Iokanaan, the phase of the white moon; the major public central episode, the dance and the beheading, the phase of the red moon; and finally the conclusion, when the black cloud conceals the moon. An argument is made by Brad Bucknell in his essay, " On "Seeing" Salome " that the play can be seen as a struggle between the visual, in the form of various characters ’ gazing as well as Salome ’ s dance, and the written word. Salome ’ s dance (which is never described) overpowers Iokannan ’ s prophecies, and Salome herself dies due to Herod ’ s command to crush her. As Bucknell writes of Salome ’ s dance, " The power of the word is inverted, turned back upon its possessors, the prophet and the ruler-figure of the tetrarch. " The idea of the gaze—specifically the male gaze—is also explored by Linda and Michael Hutcheon in "'Here's Lookin' At You, Kid": The Empowering Gaze in Salome. " In their essay, the two write that Salome ’ s body " clearly becomes the focus of the attention—and the literal eye—of both audience and characters. As dancer, Salome is without a doubt the object of the gaze—particularly Herod’s male gaze. "

In The Smallville Chronicles: Critical Essays on the Television Series, scholars examine the multiple narratives of the Smallville universe. Addressing issues related to gender, sexuality, national identity, myth, history, and politics, these essays explore how the series uses the Superman story to comment on contemporary social issues. Additional essays investigate the complex relationship the show’s audience has with the characters through blogging, fan fiction, visits to filming locations, and the creation of websites.

Architectural facades now have the potential to be literally kinetic, through automated sunscreens and a range of animated surfaces. This book explores the aesthetic potential of these new types of moving facades. Critique of theory and practice in architecture is combined here with ideas from kinetic art of the 1960 ’ s. From this background the basic principles of kinetics are defined and are used to generate experimental computer animations. By classifying the animations, a theory of kinetic form called “ state change ” is developed. This design research provides a unique and timely resource for those interested in the capacity of kinetics to enliven the public face of architecture. Extra material including animations can be seen at www.kineticarch.net/statechange

Biological control – utilizing a population of natural enemies to seasonally or permanently suppress pests – is not a new concept. The cottony cushion scale, which nearly destroyed the citrus industry of California, was controlled by an introduced predatory insect in the 1880s. Accelerated invasions by insects and spread of weedy non-native plants in the last century have increased the need for the use of biological control.

Use of carefully chosen natural enemies has become a major tool for the protection of natural ecosystems, biodiversity and agricultural and urban environments. This book offers a multifaceted yet integrated discussion on two major applications of biological control: permanent control of invasive insects and plants at the landscape level and temporary suppression of both native and exotic pests in farms, tree plantations, and greenhouses. Written by leading international experts in the field, the text discusses control of invasive species and the role of natural enemies in pest management. This book is essential reading for courses on Invasive Species, Pest Management, and Crop Protection. It is an invaluable reference book for biocontrol professionals, restorationists, agriculturalists, and wildlife biologists.
