This must-have manual provides detailed solutions to all of the 300 exercises in Dickson, Hardy and Waters' Actuarial Mathematics for Life Contingent Risks, 3 edition. This groundbreaking text on the modern mathematics of life insurance is required reading for the Society of Actuaries' (SOA) LTAM Exam. The new edition treats a wide range of newer insurance contracts such as critical illness and long-term care insurance; pension valuation material has been expanded; and two new chapters have been added on developing models from mortality data and on changing mortality. Beyond professional examinations, the textbook and solutions manual offer readers the opportunity to develop insight and understanding through guided hands-on work, and also offer practical advice for solving problems using straightforward, intuitive numerical methods. Companion Excel spreadsheets illustrating these techniques are available for free download.

Worried Sick

This pre-WWI era manual directs its readers in ambulance care?primarily through the history of the practice and the various types of equipment and forms of transportation they may have to utilize in the field.

This is a comprehensively updated source of the Code, Rules and Regulations, with notifications, circulars and guidelines on the code at one place. Over the past eight editions, this manual has built up a reputation of accuracy and authenticity and is often preferred by lawyers for this reason. Highlights ? The manual covers the Code and delegated legislation ? The footnotes contain legislative history for tracing the Code as it was at a point of time in the past
