How does a boy from a financially and intellectually impoverished background grow up to become a Harvard researcher, win international acclaim for his groundbreaking work, and catch fire as a pioneering psychologist? As the only person in the history of the American Psychological Association to have won all three of its highest honors—for distinguished research, teaching, and writing—Elliot Aronson is living proof that humans are capable of capturing the power of the situation and conquering the prison of personality. A personal and compelling look into Aronson's profound contributions to the field of social psychology, *Not by Chance Alone* is a lifelong story of human potential and the power of social change.

Elliot Aronson is among the 100 most influential psychologists of the 20th Century. He is best known for his theorizing and research on cognitive dissonance theory -- one of the most provocative and enduring theories in contemporary psychology -- and for his design of the "jigsaw classroom," an applied method of reducing conflict and prejudice in multiethnic schools. Throughout his illustrious career, he has championed the application of social-psychological theory and methods for solving such pressing social problems as prejudice, energy efficiency, conflict and miscommunication in relationships, and the reasons why many people justify their mistakes rather than learn from them. Aronson is the only psychologist in the history of the American Psychological Association to have won all three of its top awards: for research, teaching, and writing. In this Festschrift, friends, colleagues, and former students write with warmth, clarity, and humor about Aronson's enduring influence on the field of social psychology and on their own professional lives as researchers, writers, and teachers. Topics covered include contemporary research on cognitive dissonance theory; the changing face of experimentation in social psychology; and applied research on energy policy, education, the legal system, intergroup conflict, and prejudice and discrimination.

Social Psychology, Fifth Canadian Edition, captures the excitement of social psychology for students in Canada by presenting the field in a Canadian context. It combines classic and cutting-edge Canadian research in an unparalleled way, with a much-praised "story-telling approach" that makes the content more tangible and interesting to students.

"The new 11th edition of Aronson et al.'s *Social Psychology* continues a decades-long legacy of accessible and narrative-driven exploration of cutting-edge scientific research. The revised edition brings this engaging sensibility to the review of classic and emerging findings in the field, and focuses a social psychological lens on contemporary developments in the world, including the COVID-19 pandemic, the ubiquity of web-based classrooms and workplaces, sobering spikes in racial violence, and political upheaval in the United States. The 11th edition also welcomes to the author team Elizabeth Page-Gould and Neil Lewis, Jr., two social psychologists who have followed the lead of Elliot Aronson by devoting their research careers to the study of pressing societal issues such as intergroup relations and racial inequity"--

On April 20, 1999, the halls of Columbine High School in Littleton, Colorado, reverberated with the sound of gunshots as two students, highly armed and consumed with rage, killed thirteen students and seriously injured twenty-three before turning the guns on themselves. It was the worst school massacre in our nation's history. Can we prevent a tragedy like this from happening again? In Elliot Aronson's *Nobody Left to Hate*, one of our nation's leading social psychologists argues that the negative atmosphere in our schools--the exclusion, taunting, humiliation, and bullying--played a major role in triggering the pathological behavior of the shooters. At the very least, such an atmosphere makes schools an unpleasant experience for most normal students. But it doesn't have to be. *Nobody Left to Hate* offers concise, practical, and easy-to-apply strategies for creating a more supportive, stimulating, and compassionate environment in our schools. Based on decades of scientific research and classroom testing, these strategies explain how students can be taught to control their own impulses, how to respect others, and how to resolve conflicts amicably. In addition, they show teachers how to structure classes to promote cooperation, rather than competition, without sacrificing academics. On the contrary, education is greatly enhanced. For parents, teachers, or anyone concerned with what is happening in our schools, *Nobody Left to Hate* provides a simple and effective plan of action that will make their children's school not only a safe place, but a more humane place of learning.

Exploring the key ideas in social psychology, this collection of classic and contemporary readings includes accounts of specific experimental findings as well as more general articles summarizing studies on such topics as attraction, prejudice, and aggression. The new edition adds 15 new readings while retaining a number of classics by leading psychological thinkers such as Stanley Milgram on obedience and Solomon Asch on conformity. *Readings* makes the perfect companion for the Aronson's highly praised book, *The Social Animal* as it follows the same major themes. The Reader can also be used with any introductory social psychology text or even in lieu of a text. Using both *The Social Animal* textbook and the reader is a unique and engaging combination for understanding social psychology and its research.
