International finance has become one of the hottest topics in national debates with tariff wars and EU membership dominating the news. As multinational corporations (MNCs) continue to expand their operations globally, they must not only manage the advantages that ensue but also their exposure to risk. The fifth edition of Madura and Fox's International Financial Management offers students a comprehensive introduction to this fast-moving field, discussing not only exchange rate behaviour, exchange rate risk management, long- and short-term asset and liability management, but also topics such as different currencies, dissimilar political situations, imperfect markets and diversified opportunity sets. Engaging real-world examples, critical debate questions and project workshop activities equip students with the essential knowledge they need to succeed in international finance. This textbook is suitable for both final year undergraduate and master's level courses in international financial management. This title is available with MindTap, a flexible online learning solution that provides students with all the tools they need to succeed including an interactive eReader, engaging multimedia, practice questions, assessment materials, revision aids, and analytics to help you track their progress.

Financial Markets and Institutions, 5e offers a unique analysis of the risks faced by investors and savers interacting through financial institutions and financial markets, as well as strategies that can be adopted for controlling and managing risks. Special emphasis is put on new areas of operations in financial markets and institutions such as asset securitization, off-balance-sheet activities, and globalization of financial services.

Cross-border transactions involve a variety of financial operations, including arbitrage, hedging, speculation, financing and investment. These inter-related operations give rise to foreign exchange exposure and affect the overall financial performance of multinational firms. The book aims to provide an integrated treatment of multinational financial operations, whilst taking into account some real world complexities such as bid/offer spreads, transaction costs,
