The solutions manual for Bolton and Dewatripont's Contract Theory includes complete solutions to 27 of the 54 exercises in the text. Contract Theory by Patrick Bolton and Mathias Dewatripont, a comprehensive textbook on contract theory suitable for use at the graduate and advanced undergraduate levels, covers the areas of agency theory, information economics, and organization theory and presents many applications in all areas of economics, especially labor economics, industrial organization, and corporate finance. The exercises at the end of the book not only review, chapter by chapter, the basic concepts introduced in the text but also explore additional ideas and applications based on teaching material accumulated over the years by the authors and other instructors of contract theory. The solutions manual to this essential text gives complete solutions to 27 of the 54 exercises in the text, allowing students to study and compare their answers and take greater advantage of this crucial part of the book. The solutions manual follows the structure of the text, grouping exercises by chapter. Chapters 2-6 cover such static bilateral contracting problems as screening, signaling, and moral hazard; chapters 7 and 8 treat multilateral contracting, including auctions, bilateral trade under private information, and multiagent moral hazard; chapters 9 and 10 explore problems of repeated bilateral contracting; and chapters 11-13 cover incomplete contracts, the theory of ownership and control, contracting with externalities, and common agency.

A comprehensive introduction to contract theory, emphasizing common themes and methodologies as well as applications in key areas. Despite the vast research literature on

topics relating to contract theory, only a few of the field's core ideas are covered in microeconomics textbooks. This long-awaited book fills the need for a comprehensive textbook on contract theory suitable for use at the graduate and advanced undergraduate levels. It covers the areas of agency theory, information economics, and organization theory, highlighting common themes and methodologies and presenting the main ideas in an accessible way. It also presents many applications in all areas of economics, especially labor economics, industrial organization, and corporate finance. The book emphasizes applications rather than general theorems while providing self-contained, intuitive treatment of the simple models analyzed. In this way, it can also serve as a reference for researchers interested in building contract-theoretic models in applied contexts. The book covers all the major topics in contract theory taught in most graduate courses. It begins by discussing such basic ideas in incentive and information theory as screening, signaling, and moral hazard. Subsequent sections treat multilateral contracting with private information or hidden actions, covering auction theory, bilateral trade under private information, and the theory of the internal organization of firms; long-term contracts with private information or hidden actions; and incomplete contracts, the theory of ownership and control, and contracting with externalities. Each chapter ends with a guide to the relevant literature. Exercises appear in a separate chapter at the end of the book.

Evolutionary theory belongs to the rare species of theories that are simultaneously fundamental and over-arching, implicating as it does numerous life contexts as well as an array of scholarly disciplines. Armed with a profound grasp of evolutionary theory and its implications to social research, Professors Zumbansen and Calliess have mobilized an appropriately diverse and truly stellar group of academics to investigate how this theory may provide new insights about law, economics, and their inter-relations. Cast against an especially broad intellectual backdrop set by the editors, this volume is sure to become a standard reference in literature. Amir N. Licht, Radzyner School of Law, Israel Zumbansen and Calliess have done a wonderful job in assembling papers from the leading scholars in the field, who draw on evolutionary approaches for explaining developments in both economics and the law. Anybody interested in issues of institutional change will be inspired by the wealth of ideas and the diversity of perspectives. Stefan Voigt, University of Hamburg, Germany Law and economics has arguably become one of the most influential theories in contemporary legal theory and adjudication. The essays in this volume, authored by both legal scholars and economists, constitute lively and critical engagements between law and economics and new institutional economics from the perspectives of legal and evolutionary theory. The result is a fresh look at core concepts in law and economics such as institutions , institutional change and market failure that offer new perspectives on the relationship between economic and legal governance. The increasingly transnational dimension of regulatory governance presents lawyers, economists and social scientists with an unprecedented number of complex analytical and conceptual questions. The contributions to this volume engage with legal theory, new

institutional economics, economic sociology and evolutionary economics in an interdisciplinary assessment of the capacities and limits of the state, markets and institutions. Drawing as well upon legal sociology and the philosophy of law, the authors expand and transform the known terrain of law and economics by applying evolutionary theory to both law and economics from a domestic and transnational perspective. Legal scholars, evolutionary and regulatory theorists, economists, economic sociologists, economic historians and political scientists will find this cutting-edge volume both challenging and engaging.

*Social Theory: Its Origins, History, and Contemporary Relevance* analyzes the tradition of social theory in terms of its origins and changes in kind of societies. Rossides provides a full discussion of the sociohistorical environments that generated Western social theory with a focus on the contemporary modern world. While employing a sociology of knowledge approach that identifies theories as aristocratic versus democratic, liberal versus socialist and also liberal feminist versus radical feminist; it attempts to construct a scientific, unified social theory in the West. Additionally, it also features African American theory, American culture studies, political and legal philosophy, and environmental theory.

Margaret Gilbert offers an incisive new approach to a classic problem of political philosophy: when and why should I do what the laws of my country tell me to do? Beginning with carefully argued accounts of social groups in general and political societies in particular, the author argues that in central, standard senses of the relevant terms membership in a political society in and of itself obligates one to support that society's political institutions. The obligations in

question are not moral requirements derived from general moral principles, as is often supposed, but a matter of one's participation in a special kind of commitment: joint commitment. An agreement is sufficient but not necessary to generate such a commitment. Gilbert uses the phrase 'plural subject' to refer to all of those who are jointly committed in some way. She therefore labels the theory offered in this book the plural subject theory of political obligation. The author concentrates on the exposition of this theory, carefully explaining how and in what sense joint commitments obligate. She also explores a classic theory of political obligation — actual contract theory — according to which one is obligated to conform to the laws of one's country because one agreed to do so. She offers a new interpretation of this theory in light of a theory of plural subject theory of agreements. She argues that actual contract theory has more merit than has been thought, though the more general plural subject theory is to be preferred. She compares and contrasts plural subject theory with identification theory, relationship theory, and the theory of fair play. She brings it to bear on some classic situations of crisis, and, in the concluding chapter, suggests a number of avenues for related empirical and moral inquiry. Clearly and compellingly written, *A Theory of Political Obligation* will be essential reading for political philosophers and theorists.

This book introduces and develops Contract Governance as a new approach to contract theory. While the concept of governance has already been developed in Williamson's seminal article, it has, ironically, not received much attention in general contract law theory. Indeed, Contract Governance appears to be an important and necessary complement to corporate governance and in fact, as the second, equally important pillar of governance research in the

core of private law. With this in mind, Grundmann, Möslin, and Riesenhuber provide a novel approach in setting an international and interdisciplinary research agenda for developing contract law scholarship. Contract Governance focuses particularly on the ways in which a governance perspective leads to research questions that have been neglected in traditional contract law scholarship, and how, from a governance perspective, the questions are dealt with in a different manner and style. Combining substantive chapters and commentaries, this collection of essays addresses an array of topics, including: third party impact and contract governance problems in herd behaviour; governance of networks of contracts; governance in long-term contractual relationships; contract governance and rule setting; and contract governance and political dimensions.

Services play an increasing economic role in developed countries. As companies have outsourced and continue to outsource (part of) their service provision, sourcing has gained importance as a field of interest, both from a practical and academic perspective. This book gives an updated perspective on the topic of sourcing services as well as insights into the current state-of-the-art in practice by means of the case company examples.

This new volume draws from provocative discussions on the urban social contract among policy makers, researchers, public intellectuals, and citizens at the 2015 UIC Urban Forum. Michael A.
