Asian countries. Divided into three parts, it addresses the implications of uniformity and diversity for the substantive representation of women in parliament, civil service and local government. The contributing authors explore the scope and limits of "positive discriminatory policies" within distinct country contexts, and the implications of the lack of such policies in other countries. Their findings shed new light on the extent to which the higher presence of women in different governing institutions matters, particularly in respect of promoting women's issues; and also on the way men and women in different governing institutions look upon each other's roles and adopt strategies for mutual adjustment. This innovative collection will appeal to students and scholars of gender studies, public policy and administration, international relations, law and political science.

The importance of moving toward high-quality, global standards of accounting and auditing has never been clearer. enterprises, and furthering economic integration. For nearly 10 years, the World Bank has prepared diagnostic Reports on the Observance of Standards and Codes (ROSCs) on Accounting and Auditing (A and A) at the country level. In Latin America and the Caribbean, ROSC A and A reports have been completed for 17 countries. This book takes a step back and seeks to distill lessons from a regional perspective. 'Accounting for Growth in Latin America and the Caribbean' is the first book to examine financial reporting and auditing in the region in a systematic way, drawing on the World Bank's years of experience and analysis in this area. The book is designed to inform the policy dialogue on accounting and auditing issues among government officials, the accounting profession, the private sector, academia, and civil society in LAC countries.
