Street-involved children are particularly vulnerable to human rights abuses within criminal justice systems: they are more likely to come into contact with the system in the first place (whether or not they have actually committed an offence) and are less able to defend themselves from abuses once within the system. Due to their lack of contact with responsible adults and lack of fixed address street children are less likely to benefit from diversion schemes, release mechanisms such as bail ...

As opposed to the traditional system of the administration of juvenile justice, the Children's Act has recognized the rights and welfare of the child. There are approximately 30,000 street children nationwide, of whom 3,700 are children "of the street", that is, children who actually both reside and work on the street.

Street children, violence and juvenile justice systems One of the biggest challenges that street children face is persistent exposure to and direct experiences of violence, be it physical, sexual and/or psychological in nature. Indeed, a push factor causing children to connect with the street is home-based violence.

More than 48,000 youth held in the juvenile and criminal justice systems during the pandemic are at greater risk of infection AND of experiencing additional trauma and lifelong harm because of a lack of mental health care services. These youth are less healthy than their peers and suffer from a number of pre-existing conditions that may make them more likely to become seriously ill if exposed to COVID-19.

To the Vietnamese government - To UN agencies. and donor governments. -- Appendix A. -- Appendix B.

Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and "get tough" pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an authoritative review of the best available data and analysis. Juvenile Crime, Juvenile Justice presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents--trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance--the probability that delinquency or criminal activities decrease with age--and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? Juvenile Crime, Juvenile Justice presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

The authors begin with an overview of homeless children around the world, then focus on the situation in Nairobi, Kenya.
