Material is an adaptable system of guidelines, components, and tools that support the best practices of user interface design. Backed by open-source code, Material streamlines collaboration between designers and developers, and helps teams quickly build beautiful products.

The definitive reference for technical writers, editors, and documentation managers, *Read Me First! A Style Guide for the Computer Industry, Third Edition*, has been revised and updated to cover everything from creating screencasts and referencing web sites to writing for wikis. This award-winning guide to creating clear, consistent, and easy-to-understand documentation covers everything from grammar and writing style to typographic and legal guidelines. The authors, who are senior editors and writers at Sun Microsystems, share their extensive experience and provide practical tips and recommendations, including guidance on hiring writers, working with illustrators, managing schedules and workflow, and more. The third edition of *Read Me First* features new chapters on: Writing for wikis and encouraging wiki collaboration Creating screencasts, using screencast terminology, and guidelines for writing narration Creating alternative text for nontext elements such as screen captures, multimedia content, illustrations, and diagrams It also includes new tables for symbol name conventions, for common anthropomorphisms, and for common idioms and colloquialisms. An updated and expanded recommended reading list suggests additional resources.

The "E-Learning Methodologies" guide will support professionals involved in the design and development of e-learning projects and products. The guide reviews the basic concepts of e-learning with a focus on adult learning, and introduces the various activities and roles involved in an e-learning project. The guide covers methodologies and tips for creating interactive content and for facilitating online learning, as well as some of the technologies used to create and deliver e-learning.

Learn how to incorporate the power of more effective graphic design in your manuals, handouts, and job aids. This unique resource will help you improve the visual appeal and effectiveness of your printed materials through the use of graphic design techniques. Whether you're designing a one-page handout or a 200 page leader's guide, this book is a rich resource you can turn to for layout ideas and advice. A resource section includes 34 ready-to-use design layouts for workbooks, handouts, instructor guides, and job aids. All the specifications are included so you can quickly and easily reproduce these proven graphic designs in your own training materials.

This volume contains the papers presented at the International Workshop on Tools for Working with Guidelines, (TFWWG 2000), held in Biarritz, France, in October 2000. It is the final outcome of the International Special Interest Group on Tools for Working with Guidelines. Human-computer interaction guidelines have been recognized as a uniquely relevant source for improving the usability of user interfaces for interactive systems. The range of interactive techniques exploited by these interactive systems is rapidly expanding to include multimodal user interfaces, virtual reality systems, highly interactive web-based

applications, and three-dimensional user interfaces. Therefore, the scope of guidelines' sources is rapidly expanding as well, and so are the tools that should support users who employ guidelines to ensure some form of usability. Tools For Working With Guidelines (TFWWG) covers not only software tools that designers, developers, and human factors experts can use to manage multiple types of guidelines, but also looks at techniques addressing organizational, sociological, and technological issues.

The field of technical communication is rapidly expanding in both the academic world and the private sector, yet a problematic divide remains between theory and practice. Here Stuart A. Selber and Johndan Johnson-Eilola, both respected scholars and teachers of technical communication, effectively bridge that gap. *Solving Problems in Technical Communication* collects the latest research and theory in the field and applies it to real-world problems faced by practitioners—problems involving ethics, intercultural communication, new media, and other areas that determine the boundaries of the discipline. The book is structured in four parts, offering an overview of the field, situating it historically and culturally, reviewing various theoretical approaches to technical communication, and examining how the field can be advanced by drawing on diverse perspectives. Timely, informed, and practical, *Solving Problems in Technical Communication* will be an essential tool for undergraduates and graduate students as they begin the transition from classroom to career.

This two-volume set LNCS 11592 and 11593 constitutes the refereed proceedings of the 5th International Conference on Human Aspects of IT for the Aged Population, ITAP 2019, held in July 2019 as part of HCI International 2019 in Orlando, FL, USA. HCII 2019 received a total of 5029 submissions, of which 1275 papers and 209 posters were accepted for publication after a careful reviewing process. The 86 papers presented in these two volumes are organized in topical sections named: Design with and for the Elderly, Aging and Technology Acceptance, Aging and the User Experience, Elderly-Specific Web Design, Aging and Social Media, Games and Exergames for the Elderly, Ambient Assisted Living, Aging, Motion, Cognition, Emotion and Learning.
