leveling, angles, area computation, computer calculations, topographic surveying, electronic distance measuring instruments, and construction surveying. The text includes photos and diagrams, lists of useful addresses and degree programs, surveying tables, and formulas. New co-authors Wayne A. Sarasua and William J. Davis bring a fresh perspective to this classic text. This text is suitable for students in a one-semester course at two and four-year colleges taking their first course on surveying.

Comprehensive, yet written in readily-accessible language, this overview of surveying is intended for those with no previous exposure to the subject. New features to this edition include the introduction of the Global Positioning
