Suzuki DL 1000 V-Strom Suzuki's V-Strom, launched in 2002, is a large-capacity trail-styled tourer based around the V-twin engine from the firm's TL1000. Re-tuned for enhanced low-and mid-range performance, the engine has been updated with the latest version of Suzuki's SDTV dual-valve fuel-injection, and a catalytic converter in the exhaust.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America ' s premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede ' s wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid ' s, handle like a pro ' s. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension ' s condition. He outlines testing procedures that will help you gauge how well you ' re improving your suspension, along with your riding. And, if you ' re inclined to perfect your bike ' s handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

This book analyses the Association of Southeast Asian Nations (ASEAN) as a powerful actor in International Relations by examining how the ASEAN community has evolved, looking specifically at its relationship with the EU with regards to human rights. The book adds to important contemporary debates within constructivist theory, shedding light on the need for ' critical ' constructivism that emphasises language and contestation and what that may entail. On an empirical level, it challenges the idea of an 'EU-centrism,' demonstrating how ASEAN is the major driving force behind its human rights and community aspirations, as well as within the ASEAN-EU relationship. Furthermore, this book engages with the introspection surrounding constructivism by addressing the trouble with 'norms,' and instead unpacking the relationship between ASEAN and the EU to show language power in play. In particular, the book looks at how language, or rather coercive language, helps us ' see ' contestation in action, something that researchers sympathetic towards the idea of ASEAN ' s ' resistance ' have been unable to show through a focus on norms. Tracing the evolution of the ASEAN community and human rights aspirations in a new light, showing how exactly the EU remains an inspiration, but not a model, and more interestingly how ASEAN demonstrates power in the relationship, the book will be of interest to academics working on Asian Studies, European Studies, International Relations Theory and human rights.

More than a memoir of a custom cafe racer build this book is a tribute to a teacher who inspired young people to be creative with their minds and capable with their hands. Growing up in Fargo, North Dakota in the 1970s and 80s, The Urban Monk had the opportunity to develop a love for machines, metal working and motorcycles. This book provides a glimpse into what life was like for the author and his young friends in Fargo during that time. It is also a poignant defense of industrial arts education in public schools. After an over three year effort building a custom cafe racer in his spare time and documenting the entire process in videos shared with the world on his YouTube channel Urban Monk TV, the author tells the story of how this project became more than a custom motorcycle build - it became a tribute to his middle school Metal Shop teacher who inspired him to go on to a life time of peaceful meditation in his garage with a wrench in his hand. Anyone interested in motorcycles, mechanics, do-it-yourself projects or a historical retrospective of life in 70s-80s Fargo will enjoy this pleasant read.

Advancements in research in psychological science have afforded great insights into how our minds work. Making an Impact on Mental Health and Illnessanalyzes contemporary, international research to examine a number of core themes in mental health, such as mindfulness and attachment, and provide an understanding of the sources of mentally ill health and strategies for remediation. The originality of this work is the embedding of psychological science in an evolutionary approach. Each chapter discusses the context of a specific research project, looking at the methodological and practical challenges, how the results have been interpreted and communicated, the impact and legacy of the research, and the lessons learnt. As a whole, the book looks at how social environments shape who we are and how we form relationships with others, which can be detrimental, but equally a source of flourishing and wellbeing. Covering a range of themes conducive to understanding and facilitating improved mental health, Making an Impact on Mental Health and Illness invaluable reading for advanced students in clinical psychology and professionals in the mental health field.

This book examines the risks to freedom of expression, particularly in relation to the internet, as a result of regulation introduced in response to terrorist threats. The work explores the challenges of maintaining security in the fight against traditional terrorism while protecting fundamental freedoms, particularly online freedom of expression. The topics discussed include the clash between freedom of speech and national security; the multijurisdictional nature of the internet and the implications for national sovereignty and transnational legal structures; how to determine legitimate and illegitimate association online; and the implications for privacy and data protection. The book presents a theoretical analysis combined with empirical research to demonstrate the difficulty of combatting internet use by terror organizations or individuals and the range of remedies that might be drawn from national and international law. The work will be essential reading for students, researchers and policy makers in the areas of Constitutional law, Criminal Law, European and International law, Information and Technology law and Security Studies.

Meet the moteliers creating the experience for a new generation to enjoy. The stories and photographs in Sleeping Around in America give readers an opportunity to rekindle fond memories of family vacations, road trips and childhood experiences while providing a roadmap of motels where they can travel to today. A book to satisfy armchair travellers, American pop-culture enthusiasts and nostalgia seeking adventure romantic explorers.

This book presents an alternative roadmap for a world characterised by geopolitical uncertainty. The surging expectations about a future world of democratic values and high economic growth, born out of superpower bonhomie at the end of the Cold War, did not lead to the promised outcomes. Instead we are faced with deeply destabilising challenges, like climate change, widespread state fragility, terrorism, arms race, disruptive newer technologies, global economic volatility, and ineffectiveness of multilateral institutions, old and new. The volume: surveys the intellectual discourse, the attempts to redesign the global institutions, and the geopolitical trends since the end of the Cold War for an understanding of the contemporary geopolitics, analyses the characteristics of the contemporary geopolitics, the seeming intractability of the global challenges, and the ongoing discourse about preventing their further deterioration, foregrounds the Gandhian praxis and IR theory for managing power transitions anchored in non-violent mobilisation of empowered masses, ensuring institutional resilience, and illustrates them through ongoing conflicts in Iraq and Afghanistan, outlines an approach, based on the Gandhian experience of managing political change, towards conflict, geopolitical uncertainties, and institutional ineffectiveness for securing a better future globally, including South Asia. Accessibly written, this volume will be indispensable for foreign policy experts, government think tanks, and career bureaucrats. It will also be essential for scholars and researchers of international relations, foreign policy, politics, and governance and public policy.

Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Suzuki DL650 V-Strom & SFV650 Gladius, model years 2004 through 2013. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. A typical Haynes manual covers: general information; troubleshooting; lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.
