The modern periodic table has elements arranged in order of atomic number, which is the number of protons in an atom whereas the atomic mass is based on the entire mass of the atom. To help overcome this alternative theory, encourage your students to look closely at the table and discover for themselves how the numbers increase.

What do chocolate chip cookies, chemistry and logic have in common? They are the basis for a unit that lets students become actively engaged in discovering the arrangement of the periodic table. This learning activity takes the periodic table out of the static presentation usually associated with textbooks and chemistry courses and interjects an element of discovery. The two activities in this unit provide students with information that they have to arrange in organized charts. In the process of creating the arrangements, students will be involved in problem solving and will gain an appreciation for the scientific process of exploration and verification. This dynamic unit meets national science standards in seven teaching and content areas. Bring the periodic table to life with this hands-on,
