Several major technical hurdles face protein array technology namely the acquisition, arraying, and stable attachment of proteins to array surfaces and detection of interacting proteins ...

A guide to online investing covers such topics as screening investments, using Excel for financial analysis, analyzing company information, executing trades, mutual fund investments, managing a portfolio, and financial planning.

For the second time, the European Software Engineering Conference is being held jointly with the ACM SIGSOFT Symposium on the Foundations of Software Engine- ing (FSE). Although the two conferences have different origins and traditions, there is a significant overlap in intent and subject matter. Holding the conferences jointly when they are held in Europe helps to make these thematic links more explicit, and enco- ages researchers and practitioners to attend and submit papers to both events. The ESEC proceedings have traditionally been published by Springer-Verlag, as they are again this year, but by special arrangement, the proceedings will be distributed to members of ACM SIGSOFT, as is usually the case for FSE. ESEC/FSE is being held as a single event, rather than as a pair of colocated events. Submitted papers were therefore evaluated by a single program committee. ESEC/FSE represents a broad range of software engineering topics in (mainly) two continents, and consequently the program committee members were selected to represent a spectrum of both traditional and emerging software engineering topics. A total of 141 papers were submitted from around the globe. Of these, nearly half were classified as research - pers.aquarterasexperiencepapers.andtherestasbothresearchandexperiencepapers. Twenty-nine papers from five continents were selected for presentation and inclusion in the proceedings. Due to the large number of industrial experience reports submitted, we have also introduced this year two sessions on short case study presentations.

The field of professional, academic and vocational qualifications is ever-changing. The new edition of this practical guide provides thorough information on all developments in these areas in the UK. Fully indexed, it includes details on all university awards and over 200 career fields, their professional and accrediting bodies, levels of membership and qualifications. British Qualifications is a unique resource for human resource managers and university admissions officers to verify the qualifications of potential employees and students.

th This volume contains the proceedings of AMAST 2008, the 12 International Conference on Algebraic Methodology and Software Technology, held during July 28-31, 2008, in Urbana, Illinois, USA. The major goal of the AMAST conferences is to promote research toward settingssoftwaretechnologyna?rm, mathematicalbasis.Worktowardthisgoal isacollaborative, internationale?ortwithcontributionsfrombothacademiaand industry. The envisioned virtues of providing software technology developed on a mathematical basis include: correctness, which can be proved mathematically; safety, so that developed software can be used in the implementation of critical systems; portability, i.e., independence from computing platforms and language generations; and evolutionary change, i.e., the software is self-adaptable and evolves with the problem domain. The previous AMAST conferences were held in: Iowa City, Iowa, USA (1989, 1991 and 2000); Twente, The Netherlands (1993); Montreal, Canada (1995); Munich, Germany (1996); Sydney, Australia (1997); Manaus, Brazil (1998); Reunion Island, France (2002); Stirling, UK (2004, colocated with MPC 2004); Kuressaare, Estonia (2006, colocated with MPC 2006). For AMAST 2008 there were 58 submissions, which were thoroughly eva- atedbytheProgramCommittee.Eachsubmissionhadanaverageof7verereviews. Followingalivelyelectronicmeeting, theProgramCommitteeselected28papers to be presented at the conference, including 5 tool papers. In addition to the - cepted papers, the conference also featured invited talks by three distinguished speakers: Rajeev Alur (University of Pennsylvania), Jayadev Misra (University of Texas at Austin), and Teodor Rus (University of Iowa). This volume includes all the accepted papers, as well as abstracts or full papers by invited speakers.

An updated edition of the classic guide to technical communication Consider that 20 to 50 percent of a technology professional's time is spent communicating with others. Whether writing a memo, preparing a set of procedures, or making an oral presentation, effective communication is vital to your professional success. This anthology delivers concrete advice from the foremost experts on how to communicate more effectively in the workplace. The revised and expanded second edition of this popular book completely updates the original, providing authoritative guidance on communicating via modern technology in the contemporary work environment. Two new sections on global communication and the Internet address communicating effectively in the context of increased e-mail and web usage. As in the original, David Beer's Second Edition discusses a variety of approaches, such as: * Writing technical documents that are clear and effective * Giving oral presentations more confidently * Using graphics and other visual aids judiciously * Holding productive meetings * Becoming an effective listener The new edition also includes updated articles on working with others to get results and on giving directions that work. Each article is aimed specifically at the needs of engineers and others in the technology professions, and is written by a practicing engineer or a technical communicator. Technical engineers, IEEE society members, and technical writing teachers will find this updated edition of David Beer's classic Writing and Speaking in the Technology Professions an invaluable guide to successful communication.
