The term "public opinion" means the feeling or sentiment shared by most people, the voice of the people. This definition may be simple, but it is often difficult to determine what the public's opinion is on any given issue and how to interpret its meaning. This two-volume encyclopedia defines and discusses the history and development of public opinion as a concept in democracy, major public opinion controversies in American politics, and the science and methods of opinion polling. Over 170 signed entries explain the major concepts, people, historical events, organizations, practice and theory, and measurement methods of public opinion and political opinion polling in the United States.

This book shows how African American literature emerged as a world-recognized literature: less as the product of a seamless tradition of writers signifying upon their ancestors and more the product of three generations of ambitious, competitive individuals aiming to be the first great African American writer. It charts a canon of fictional landmarks, beginning with *The House Behind the Cedars* and culminating in the National Book Awards Winner *Invisible Man*, and tells the compelling stories of the careers of key African writers, including Charles Chesnutt, James Weldon Johnson, Jean Toomer, Zora Neale Hurston, Richard Wright, and Ralph Ellison. These writers worked within the white-dominated, commercial, Eurocentric literary field to put African American literature on the world literary map, while struggling to transcend the cultural expectations attached to their position as 'Negro authors'. *Literary Ambition and the African American Novel* tells as much about the novels that these writers could not publish as it does about their major achievements.

This expansive *Companion* offers a set of fresh perspectives on the wealth of texts produced in and around what is now the United States. Highlights the diverse voices that constitute American literature, embracing oral traditions, slave narratives, regional writing, literature of the environment, and more Demonstrates that American literature was multicultural before Europeans arrived on the continent, and even more so thereafter Offers three distinct paradigms for thinking about American literature, focusing on: genealogies of American literary study, writers and issues; and contemporary theories and practices Enables students and researchers to generate richer, more varied and more comprehensive readings of American literature

In conjunction with top survey researchers around the world and with Nielsen Media Research serving as the corporate sponsor, the *Encyclopedia of Survey Research Methods* presents state-of-the-art information and methodological examples from the field of survey research. Although there are other "how-to" guides and references texts on survey research, none is as comprehensive as this *Encyclopedia*, and none presents the material in such a focused and approachable manner. With more than 600 entries, this resource uses a Total Survey Error perspective that considers all aspects of possible survey error from a cost-benefit standpoint.

The official monthly record of United States foreign policy.

List of Rhodes scholars, 1904-1915: v 2 p. [145]-161. Vol. for 1934- include Addresses and occupations of Rhodes scholars and other Oxonians (called 1934-36. Addresses and occupations of Rhodes scholars).
