A provocative and entertaining look at the psychology of superstition and religion, how they make us human—and how we can use them to our advantage. What is so special about touching a piano John Lennon once owned? Why do we yell at our laptops? And why do people like to say, “Everything happens for a reason”? Drawing on cognitive science, anthropology, and neuroscience, Matthew Hutson shows us that magical thinking is not only hardwired into our brains—it’s been a factor in our evolutionary success. Magical thinking helps us believe that we have free will and an underlying purpose as it protects us from the paralyzing awareness of our own mortality. Interweaving entertaining stories, personal reflections, and sharp observations, *The 7 Laws of Magical Thinking* reveals just how this seemingly irrational process informs and improves the lives of even the most hardened skeptics.

In this witty and perceptive debut, a former editor at *Psychology Today* shows us how magical thinking makes life worth living. Psychologists have documented a litany of cognitive biases-misperceptions of the world-and explained their positive functions. Now, Matthew Hutson shows us that even the most hardcore skeptic indulges in magical thinking all the time-and it's crucial to our survival. Drawing on evolution, cognitive science, and neuroscience, Hutson shows us that magical thinking has been so useful to us that it's hardwired into our brains. It encourages us to think that we actually have free will. It helps make us believe that we have an underlying purpose in the world. It can even protect us from the paralyzing awareness of our own mortality. In other words, magical thinking is a completely irrational way of making our lives make rational sense. With wonderfully entertaining stories, personal reflections, and sharp observations, Hutson reveals our deepest fears and longings. He also assures us that it is no accident his surname contains so many of the same letters as this imprint.

Why do rational people buy notions that seem utterly incredulous? (And that includes you.) Everyone – even the most jaded and sceptical – believes in ‘magic’, in the form of luck, mind over matter, the power of similarities, jinxes, and destiny. In this wonderful exploration of psychology, Matthew Hutson takes us on a fascinating tour of magical thinking in everyday life, revealing the healing power of John Lennon’s piano; the reason gamblers kiss their tickets; and why admitting you have no free will staves off addiction.
