On an Earth that saw the weaponization of demons instead of uranium during World War II, a lone agent battles supernatural forces--and enemies within her own government--to unravel a conspiracy that threatens our very existence. This vivid alternate history sets the stage for a modern-day fantasy adventure that's equal parts Harry Potter and The X-Files. Across the world, a steady flow of illegally trafficked demons is fueling terrorist attacks known as "Heartstoppers," which leave bodies lifeless but not technically dead. Authorities have identified Gooseberry Bluff Community College of Magic, a quaint school on the border of Minnesota and Wisconsin, as a demon trafficking pipeline. Now it's up to Joy Wilkins, a young agent from the Federal Bureau of Magical Affairs, to go undercover as a professor and find the source. But when her mentor turns up murdered and the clues point to a secret society known as the Thirteenth Rib, Joy finds herself in the middle of an ancient war that leaves our world hanging in the balance. This book was initially released in episodes as a Kindle Serial. All episodes are now available for immediate download as a complete book. Learn more about Kindle Serials

How the scientific study of magic reveals intriguing--and often unsettling--insights into the mysteries of the human mind. What do we see when we watch a magician pull a rabbit out of a hat or read a person's mind? We are captivated by an illusion; we applaud the fact that we have been fooled. Why do we enjoy experiencing what seems clearly impossible, or at least beyond our powers of explanation? In *Experiencing the Impossible*, Gustav Kuhn examines the psychological processes that underpin our experience of magic. Kuhn, a psychologist and a magician, reveals the intriguing--and often unsettling--insights into the human mind that the scientific study of magic provides. Magic, Kuhn explains, creates a cognitive conflict between what we believe to be true (for example, a rabbit could not be in that hat) and what we experience (a rabbit has just come out of that hat!). Drawing on the latest psychological, neurological, and philosophical research, he suggests that misdirection is at the heart of all magic tricks, and he offers a scientific theory of misdirection. He explores, among other topics, our propensity for magical thinking, the malleability of our perceptual experiences, forgetting and misremembering, free will and mind control, and how magic is applied outside entertainment--the use of illusion in human-computer interaction, politics, warfare, and elsewhere. We may be surprised to learn how little of the world we actually perceive, how little we can trust what we see and remember, and how little we are in charge of our thoughts and actions. Exploring magic, Kuhn illuminates the complex--and almost magical--mechanisms underlying our daily activities.

25th Anniversary Edition--with an Introduction by the Author! The Owens sisters confront the challenges of life and love in this bewitching novel from the New York Times bestselling author of *The Rules of Magic*, *Magic Lessons*, and *The Book of Magic*. For more than two hundred years, the Owens women have been blamed for everything that has gone wrong in their Massachusetts town. Gillian and Sally have endured that fate as well: as children, the sisters were forever outsiders, taunted, talked about, pointed at. Their elderly aunts almost seemed to encourage the whispers of witchery, with their musty house and their exotic concoctions and their crowd of black cats. But all Gillian and Sally wanted was to escape. One will do so by marrying, the other by running away. But the bonds they share will bring them back--almost as if by magic... "Splendid...Practical Magic is one of [Hoffman's] best novels, showing on every page her gift for touching ordinary life as if with a wand, to reveal how extraordinary life really is."--Newsweek "[A] delicious fantasy of witchcraft and love in a world where gardens smell of lemon verbena and happy endings are possible."--Cosmopolitan
