She is the author of The Hour Between Dog and Wolf (with an introduction by Charles Simic), and of Small Gods of Grief, which won the Isabella Gardner Prize for Poetry for 2001. Her third book, A New Hunger, was selected as an ALA Notable Book Laure-Anne Bosselaar grew up in Belgium, and moved to the United States in 1987.

### **The Hour Between Dog and Wolf by Laure-Anne Bosselaar**

The number of meals a dog eats per day depends completely on the family schedule. Dogs should eat at least two meals each day, about 12 hours apart. But a breakfast, lunch, and dinner schedule is an equally great option. If more than 12 hours elapses between meals, the stomach can become hyperacidic causing nausea.

### **Feeding Times and Frequency for Your Dog | VCA Animal Hospital**

Every dog is different, but on average, a healthy dog urinates once every four to six hours. Until they are about 5 or 6 months old, puppies tend to urinate twice as often, every two hours or so.

### **Is Your Dog Peeing a Lot? Should You Worry?**

Let me begin by saying what this book isn't. It isn't an easy beach read and it isn't about dogs. The evocative title The Hour Between Dog and Wolf refers to the medieval belief that a tame dog could change into a wild wolf during the hour of dusk. According to Dr. John Coates, it's a metaphor that reflects what happens within our bodies as we take economic risks.

A successful Wall Street trader turned neuroscientist reveals how risk taking and stress transform our body chemistry Before he became a world-class scientist, John Coates ran a derivatives trading desk in New York City. He used the expression "the hour between dog and wolf" to refer to the moment of Jekyll-and-Hyde transformation traders passed through when under pressure. They became cocky and irrationally risk-seeking when on a winning streak, tentative and risk-averse when cowering from losses. In a series of groundbreaking experiments, Coates identified a feedback loop between testosterone and success—one that can cloud men's judgment in high-pressure decision-making. Coates demonstrates how our bodies produce the fabled gut feelings we so often rely on, how stress in the workplace can

impair our judgment and even damage our health, and how sports science can help us toughen our bodies against the ravages of stress. Revealing the biology behind bubbles and crashes, *The Hour Between Dog and Wolf* sheds new and surprising light on issues that affect us all.

A successful Wall Street trader turned Cambridge neuroscientist reveals the biology of financial boom and bust, showing how risk-taking transforms our body chemistry, driving us to extremes of euphoria or stressed-out depression. The laws of financial boom and bust, it turns out, have a lot to do with male hormones. In a series of startling experiments, Canadian scientist Dr. John Coates identified a feedback loop between testosterone and success that dramatically lowers the fear of risk in men, especially young men; he has vividly dubbed the moment when traders transform into exuberant high flyers "the hour between dog and wolf." Similarly, intense failure leads to a rise in levels of cortisol, which dramatically lowers the appetite for risk. His book expands on his seminal research to offer lessons from the exploding new field studying the biology of risk. Coates's conclusions shed light on all types of high-pressure decision-making, from the sports field to the battlefield, and leaves us with a powerful recognition: to handle risk isn't a matter of mind over body, it's a matter of mind and body working together. We all have it in us to be transformed from dog to wolf; the only question is whether we can understand the causes and the consequences.

Revealing the biology behind bubbles and crashes, *The Hour Between Dog and Wolf* sheds new and surprising light on issues that affect us all.

Laure-Anne Bosselaar's poetry captures the lives of "lost souls roaming"--be they young girls in convents, merchants, whores, widows, soldiers. Old Europe still lives in Bosselaar's rich language: *Entre chien et loup*, as it's known in Flanders--the time at dusk when a wolf can be mistaken for a dog.

We all have it in us to be transformed from dog to wolf.

As an unabashed dog lover, Alexandra Horowitz is naturally curious about what her dog thinks and what she knows. As a cognitive scientist she is intent on understanding the minds of animals who cannot say what they know or feel. This is a fresh look at the world of dogs -- from the dog's point of view. The book introduces the reader to the science of the dog -- their perceptual and cognitive Abilities -- and uses that introduction to draw a picture of what it might be like to be a dog. It answers questions no other dog book can -- such as: What is a dog's sense of time? Does she miss me? Want friends? Know when she's been bad? Horowitz's journey, and the insights she uncovered from studying her own dog, Pumpernickel, allowed her to understand her dog better, and appreciate her more through that understanding. The reader will be able to do the same with their own dog. This is not another dog training book. Instead, *Inside of a Dog* will allow dog owners to look at their pets' behaviour in a different, and revealing light, enabling them to understand their dogs and enjoy their relationship even more.

The book that has shaped modern dog training and ownership with its unique and scientifically sound recognition of the "cultural" differences between dogs and humans. Dogs can't read so you need to in order to really understand your dog.

Sasha Sokolov is one of few writers to have been praised by Vladimir Nabokov, who called his first novel, *A School for Fools*, "an enchanting, tragic, and touching book." Sokolov's second novel, *Between Dog and Wolf*, written in 1980, has long intimidated translators because of its complex puns, rhymes, and neologisms. Language rather than plot motivates the story--the novel is often compared to James Joyce's *Finnegans Wake*--and time, characters, and death all prove unstable. The one constant is the Russian landscape, where the Volga is a more-crossable River Styx, especially when it freezes in winter. Sokolov's fiction has hugely influenced contemporary Russian writers. Now, thanks to Alexander Boguslawski's bold and superb translation, English readers can access what many consider to be his best work.

A heartwarming story of a cute little puppy that due to a family hardship is taken to a local dog shelter. There he learns about his little pink nose that not only makes him different, but creates obstacles in his mind. When he is adopted by very loving parents, it changes his whole world. He shares many wonderful first experiences with his new parents and family until one day when one of his doggie friends tells Maxx a story that turns his world into one of worry and desperation. Maxx learns that what he thought was an obstacle turns into one of the happiest days in his life.
