The News A Users Manual

The News: A User's Manual The news is everywhere, we can't stop checking it constantly on our screens, but what is it doing to our minds? The news occupies the same dominant position in modern society as religion once did, asserts Alain de Botton – but we don't begin to understand its impact on us.

The News: A User's Manual - Alain de Botton

However as “A User's Manual” to the news, I found this book to be a disappointment. Despite the subtitle, what the book actually is, is an analysis of what the news is doing (broken into sections on politics, world news, economics, celebrities, disasters and consumption), how it is covering all these topics wrong, and how it could be doing it better.

A fascinating take on the modern news industry, The News: A User's Manual is Alain de Botton's latest success in applying philosophy to every day life in the time in which we now live. Taking inspiration from the term check the news , the aim for the author is to create 'an exercise in trying to make this ubiquitous and familiar habit seem a lot weirder and rather more hazardous than it does at present.'

The news is everywhere. We can't stop constantly checking it on our computer screens, but what is this doing to our minds? We are never really taught how to make sense of the torrent of news we face every day, writes Alain de Botton (author of the best-selling *The Architecture of Happiness*), but this has a huge impact on our sense of what matters and of how we should lead our lives. In his dazzling new book, de Botton takes twenty-five archetypal news stories—including an airplane crash, a murder, a celebrity interview and a political scandal—and submits them to unusually intense analysis with a view to helping us navigate our news-soaked age. He raises such questions as Why are disaster stories often so uplifting? What makes the love lives of celebrities so interesting? Why do we enjoy watching politicians being brought down? Why are upheavals in far-off lands often so boring? In *The News: A User's Manual*, de Botton has written the ultimate guide for our frenzied era, certain to bring calm, understanding and a measure of sanity to our daily (perhaps even hourly) interactions with the news machine. (With black-and-white illustrations throughout.)

Alain de Botton explores our relationship with 'the news' in this book full of his trademark wit and wisdom. Following on from his bestselling *Religion for Atheists*, Alain de Botton turns now to look at the manic and peculiar positions that 'the news' occupies in our lives. We invest it with an authority and importance which used to be the preserve of religion - but what does it do for us? Mixing current affairs with philosophical reflections, de Botton offers a brilliant illustrated guide to the precautions we should take before venturing anywhere near the news and the 'noise' it generates. Witty and global in reach, *The News* will ensure you'll never look at reports of a celebrity story or political scandal in quite the same way again. Praise for *Religion for Atheists*: 'Smart and stimulating . . . a sensitive analysis of the deeply human needs that faith meets' *Financial Times* 'A serious and optimistic set of practical ideas that could improve and alter the way we live . . . energetic and on the side of the angels' Jeanette Winterson, *The Times* 'Packed with tantalising goads to thought and playful prompts to action' *Independent* Alain de Botton's bestselling books include *Religion for Atheists*, *How Proust Can Change Your Life*, *The Art of Travel*, and *The Architecture of Happiness*. He lives in London and founded *The School of Life* ([www.theschooloflife.com](http://www.theschooloflife.com)) and *Living Architecture* ([www.living-architecture.co.uk](http://www.living-architecture.co.uk)). From the author of *The Architecture of Happiness*, a thought-provoking look at the manic and peculiar position that news has achieved in our lives. What does the news do to our brains, our souls and our views of one another? We spend an inordinate amount of time checking on it. It molds how we view reality, we're increasingly addicted to it on our luminous gadgets, we check it every morning when we wake up and every evening before we sleep—and yet the news has rarely been the focus of an accessible, serious, saleable book-length study. Until now. Mixing snippets of current news with philosophical reflections, *The News* will blend the timeless with the contemporary, and bring the wisdom of thousands of years of culture to bear on our contemporary obsessions and neuroses. *The News* ranges across news categories—from politics to murders, from economics to celebrities, from the weather to paparazzi shows—in search of answers to the questions: "What do we want from this?" and "Is it doing us any good?" After *The News*, we'll never look at a celebrity story, the report on a tropical storm, or the sex scandal of a politician in quite the same way again.

Represents an exploration of the relationship between imagination and reality as seen through the eyes of the dying Serge Valene, an inhabitant of a large Parisian apartment block.

Ockham's razor, the principle of parsimony, states that simpler theories are better than theories that are more complex. It has a history dating back to Aristotle and it plays an important role in current physics, biology, and psychology. The razor also gets used outside of science - in everyday life and in philosophy. This book evaluates the principle and discusses its many applications. Fascinating examples from different domains provide a rich basis for contemplating the principle's promises and perils. It is obvious that simpler theories are beautiful and easy to understand; the hard problem is to figure out why the simplicity of a theory should be relevant to saying what the world is like. In this book, the ABCs of probability theory are succinctly developed and put to work to describe two 'parsimony paradigms' within which this problem can be solved.
