Georg Wilhelm Friedrich Hegel: Philosophy of History ...

Lectures on the Philosophy of History, also translated as Lectures on the Philosophy of World History, is a major work by Georg Wilhelm Friedrich Hegel, originally given as lectures at the University of Berlin in 1822, 1828, and 1830. It presents world history in terms of the Hegelian philosophy in order to show that history follows the dictates of reason and that the natural progress of history is due to the outworking of absolute spirit. The text was originally published in 1837 by the editor

Lectures on the Philosophy of History - Wikipedia

Hegel's philosophy of history is perhaps the most fully developed philosophical theory of history that attempts to discover meaning or direction in history (1824a, 1824b, 1857). Hegel regards history as an intelligible process moving towards a specific condition—the realization of human freedom.

Philosophy of History (Stanford Encyclopedia of Philosophy)

Philosophy of history is the philosophical study of history and its discipline. The term was coined by French philosopher Voltaire. In contemporary philosophy a distinction has developed between speculative philosophy of history and critical philosophy of history, now referred to as analytic.

Philosophy of history - Wikipedia

German philosopher. Principal of the University of St. Andrews, Scotland, 1953–66. Translator of Hegel's Political Writings, Early Theological Writings, and Aesthetics. Georg Wilhelm Friedrich Hegel, (born August 27, 1770, Stuttgart, Württemberg [Germany]—died November 14, 1831, Berlin), German philosopher who developed a dialectical scheme that emphasized the progress of history and of ideas from thesis to antithesis and thence to a synthesis.

Georg Wilhelm Friedrich Hegel (/ ˈ h eɪ g ə l /; German: [ˈɡeːʁɪk ˈvɪlhɛlm ˈfʁiːdʁɪç ˈheːɡl]; 27 August 1770 – 14 November 1831) was a German philosopher and the most important figure in German idealism. He is considered one of the fundamental figures of modern Western philosophy, with his influence extending to the entire range of contemporary philosophical issues, from ...

Georg Wilhelm Friedrich Hegel - Wikipedia

In the "Introduction to the Philosophy of History," Hegel describes his remarkably influential idea that history is more than just a record or analysis of political events.

The philosophy of history is an area of interest not only to philosophers, but to historians and to social scientists. It has been of central importance in continental European philosophy since the late 18th century, and for the past half-century has had a significant place in Anglo-American philosophy. Interest in the philosophy of history continues to grow. This volume offers both an introduction to contemporary discussion in the philosophy of history, and a 'reassessment' of some of the major movements in the philosophy of history since the beginning of the 20th century. Including the work of leading international scholars in the field, the book presents a wide range of perspectives from different schools in philosophy, and in political and social theory, history, and the history of ideas. Traditional questions raised in the philosophy of history are explored with fresh insight - the nature of history; historical understanding; historical objectivity; the nature of the past; the psychological factors in historical explanation; the human significance of history - alongside issues which are less frequently examined including: the role of science and mathematics in history, history as a social science, and history as an art form. As history itself remains disputed ground, it is important to consider what clues history can provide for our response to issues of contemporary concern such as political realignments and economic globalisation; this volume offers important insights from leading scholars in the philosophy of history.

Based directly on the standard German edition by Johannes Hoffmeister, this translation presents Hegel's vision of history in a lucid, accessible form that captures the nuances of his thought.

wide criticism both from Western and Eastern scholars.

A collection of the introductory lectures Hegel delivered on the three topics between 1818 and 1831, which did much to establish his reputation as Germany's greatest philosopher of the time. He revised them over the years, so the final products represent his mature views of the three activities of the spirit, and are more comprehensible than works published during his lifetime. A new introduction and analytical table of contents are included, and Hegel's section headings restored. No bibliography. Paper edition (unseen), \$12.95. Annotation copyrighted by Book News, Inc., Portland, OR

"This book of Hegalian selections by Professor Weiss is ... very valuable. the passages incorporated are quite excellently chosen. Professor Weiss has included a long excerpt from the introductory chapters of the 'Encyclopaedia', which are Hegel's own, most successful attempt to introduce his system. He has also included some colorful sections from the 'Phenomenology', some weighty sections from the 'Science of Logic', as also the magnificently revealing paragraphs on the Absolute Idea at the end of 'Logic' in the 'Encyclopaedia'. There are also good excerpts from the 'Philosophy of Nature' and 'Philosophy of Right'. And since the translations are good, a great deal of the difficult self-revisionary thought of Hegel comes across, helped by Professor Weiss's own valuable comments."--Foreword.
