In **THE BLOOD SUGAR SOLUTION**, Dr. Mark Hyman reveals that the secret solution to losing weight and preventing not just diabetes but also heart disease, stroke, dementia, and cancer is balanced insulin levels. Dr. Hyman describes the seven keys to achieving wellness-nutrition, hormones, inflammation, digestion, detoxification, energy metabolism, and a calm mind-and explains his revolutionary six-week healthy-living program. With advice on diet, green living, supplements and medication, exercise, and personalizing the plan for optimal results, the book also teaches readers how to maintain lifelong health. Groundbreaking and timely, **THE BLOOD SUGAR SOLUTION** is the fastest way to lose weight, prevent disease, and feel better than ever.

Originally published in 1997, **DR. BERNSTEIN'S DIABETES SOLUTION** is a unique resource that covers both adult- and childhood-onset diabetes, explains step-by-step how to normalize blood sugar levels and prevent or reverse complications, and offers detailed guidelines for establishing a treatment plan. Readers will find fifty gourmet recipes, in addition to a comprehensive discussion of diet, obesity, and new drugs to curb carbohydrate craving and overeating. Now in its fourth edition, the book presents up-to-the-minute information on insulin resistance, blood-testing devices, measuring blood sugar, new types of insulin, gastroparesis and other issues, as well as updated diet guidelines. **DR. BERNSTEIN'S DIABETES SOLUTION** is the one book every diabetic must own.

Discover: How to Lower you Blood Sugar without Medication using Natural RemediesDiabetes is a common ailment today; one that affects millions of people worldwide. Unfortunately, most people feel doomed when diagnosed with this condition as the treatment recommended is harsh and controlling. The American Diabetes Association (2013) in its guidelines advises to rely on a number of prescription drugs to control the disease - which is ONE way to check diabetes Type-2; perhaps, not the best and definitely not the only one. Benefits of Treating Diabetes Naturally Prescription drugs are more often than not aids to control symptoms rather than a cure. While it is true that Type-2 diabetes does not have a cure, it has been proved beyond doubt - though not yet through scientific research - that natural remedies can control much better and bring it to a state where no medication is required. Research studies do show that diabetes responds best to a diet and lifestyle adaptation. The term "adaptation" is used because "change" often sounds too scary and alienates people from considering it. Diet and lifestyle adaptation need not be scary, bothersome or infringing on happiness. It's just an adaptation; and the adaptation would not only control diabetes, but also bring along many other health benefits such as better heart health, better weight management, better nutrition input and better ways to make exercise a part of daily routine. The natural way is not only the easiest and least stressful, but also the best way to bring this ailment under control for life. Research studies have shown that dependency on biochemical drugs is more harm than help when it is relied upon over a prolonged period. Diabetes is indeed a disorder that can be totally and whole controlled naturally. This book will show you how - step by step. Diabetes Solution: Lower you Blood Sugar without Medication using Natural Remedies Here Is A Preview Of What You'll Learn in this book... What is Diabetes, its early signs? Type 2 patients! Reverse your diabetes. Gain control of your eating habits! If you have Type 2 diabetes, whether recently diagnosed or ongoing for years, this book will open your eyes to a new type of thinking about the real cause of your diabetes and the right cure that will reverse it. After reading this book, whatever you thought about diabetes will change. If you think that diabetes is your destiny because one or both of your parents had it, you will learn that what you have inherited is only a potential. If you think Type 2 diabetes cannot be "cured," this book will show a completely different picture. The fact is, you can reverse high blood sugar and diabetes in as little as 8 weeks using the 8 steps in this book. Diabetes affects more than 23 million people in the US. Most diabetics are treated with medications or insulin injections to "control" their diabetes, yet they still develop the complications of the condition. Diabetes is considered to be the 3rd leading cause of death in the US. 1 in every 4 adults over age 65 has diabetes. "The health professionals have failed to teach people about the true nature of diabetes," says Dr. John Poothullil. "This is now a national epidemic that is dangerous and costly. Although there is awareness about diabetes, people are unaware that it is truly preventable and reversible by a simple change in diet." From his research, Dr. John can show that diabetes is caused by the consumption of grains - including wheat, barley, rice, oats, corn, and the many products made with the flour of these grains. When people excessively consume grains, it fills their fat cells and eventually forces a normal body metabolism to go haywire, leaving glucose in the bloodstream. This causes high blood sugar-and when that continues for a long period of time, it results in diabetes. "This analysis of diabetes makes far more sense than insulin resistance. It explains why diabetes is spreading in countries like China, India, England, and the US where grain is a major portion of the diet. It explains why younger and younger adults, even teenagers, are developing diabetes, given their diets of pizza, sandwiches, snack foods, cakes, muffins, doughnuts and so many products that contain grains. It also explains why some pregnant women get gestational diabetes and shed it within days after giving birth," Dr. John states. Recognizing the link between grains and high blood sugar is the key to preventing and reversing diabetes. This is Dr. John's second book. The first, *Eat Chew Live: 4 Revolutionary Ideas to Prevent Diabetes, Lose Weight & Enjoy Food*, on preventing diabetes, maintaining body weight and enjoying food intake was published in 2015. *Diabetes-The Real Cause and The Right Cure* is focused on reversing diabetes for those who already have it.

One major example of the synergy of bioactive foods and extracts is their role as an antioxidant and the related remediation of cardiovascular disease. There is compelling evidence to suggest that oxidative stress is implicated in the physiology of several major cardiovascular diseases including heart failure and increased free radical formation and reduced antioxidant defences. Studies indicate bioactive foods reduce the incidence of these conditions, suggestive of a potential cardioprotective role of antioxidant nutrients. *Bioactive Food as Dietary Interventions for Cardiovascular Disease* investigates the role of foods, herbs and novel extracts in moderating the pathology leading to cardiovascular disease. It reviews

existing literature, and presents new hypotheses and conclusions on the effects of different bioactive components of the diet. Addresses the most positive results from dietary interventions using bioactive foods to impact cardiovascular disease Documents foods that can affect metabolic syndrome and other related conditions Convenient, efficient and effective source that allows readers to identify potential uses of compounds - or indicate those compounds whose use may be of little or no health benefit Associated information can be used to understand other diseases that share common etiological pathways

Type II diabetes is a massive industry, but it's terrible medicine. Insulin resistance is not a malfunction to be fixed. It's the way cells defend themselves against toxicity from too much glucose uptake. Yet conventional medicine insists on overriding those defenses with drugs, forcing cells to take up far too much glucose, simply to clear it from the blood. The results are worsening glucose toxicity, insulin resistance, and heart disease risk. A total re-thinking of type II diabetes is long overdue, and is now here, written by a scientist who has lived through and beaten his own type II diabetes.
